

Figure S2. The Effect of IKK inhibitor on the function of MIB1. Wild-type or *MIB1*^{-/-} HCT116 cells (5×10^5) were treated with BMS-345541 (10 μ M) for 3 hr or left untreated, and then treated with TNF α (20 ng/ml) for 15 mins or left untreated before collection of cells. The cell lysates were analyzed by immunoblot with the indicated antibodies.
