

Figure S13 Mutation of the aromatic finger does not alter cellular localization of UVRAG or EEA1 before or after starvation. **(A)** Shown here are staining patterns for UVRAG (green) and EEA1 (red) in normal HeLa cells (Control), Beclin 1 knockdown HeLa cells (Beclin 1 KD), and Beclin 1 knockdown cells with stable expression of either WT or mutant (MT, F359D/F360D/W361D) Beclin 1. **(B)** Examination of Beclin 1 expression levels in the four different cells by Western blots.
