

Fig. 1 Lack of effect of okadaic acid on DHPG-induced TRPC3-mediated inward current.

Aggregate data comparing size of the DHPG-mediated TRPC3 current under control conditions and following preincubation with 1 μ M okadaic acid for 38.3 ± 2.9 mins ($n = 7$ for control and 6 for okadaic acid-exposed cells; $P = 0.3336$).
