

Supplementary information, Figure S11

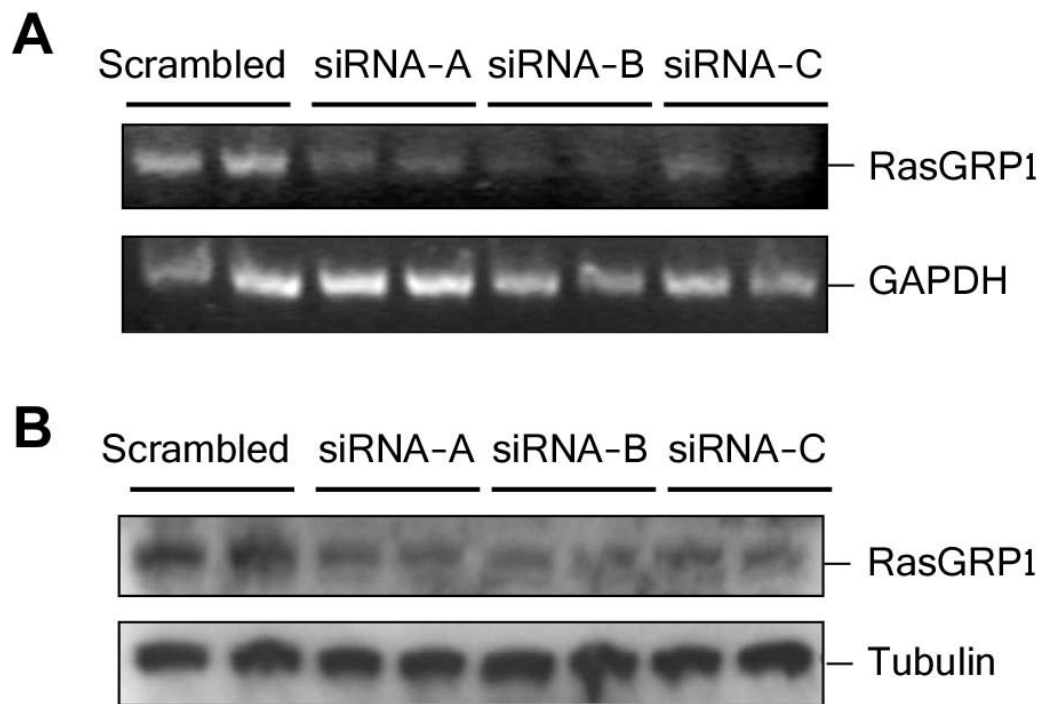

Figure S11 Analysis of RasGRP1 siRNA efficiency. **(A)** Analysis of siRNA efficiency to silence RasGRP1 by RT-PCR. HEK293T cells were transfected with synthesized siRNA as indicated. Seventy-two hours after transfection, mRNA was used to detect the interference efficiency by RT-PCR. **(B)** Analysis of siRNA efficiency to silence RasGRP1 by Western blotting. HEK293T cells were transfected with synthesized siRNA as indicated. Seventy-two hours after transfection, cell lysate was used to detect the interference efficiency by immunoblotting with antibodies for RasGRP1 and tubulin.
