

FIGURE S4

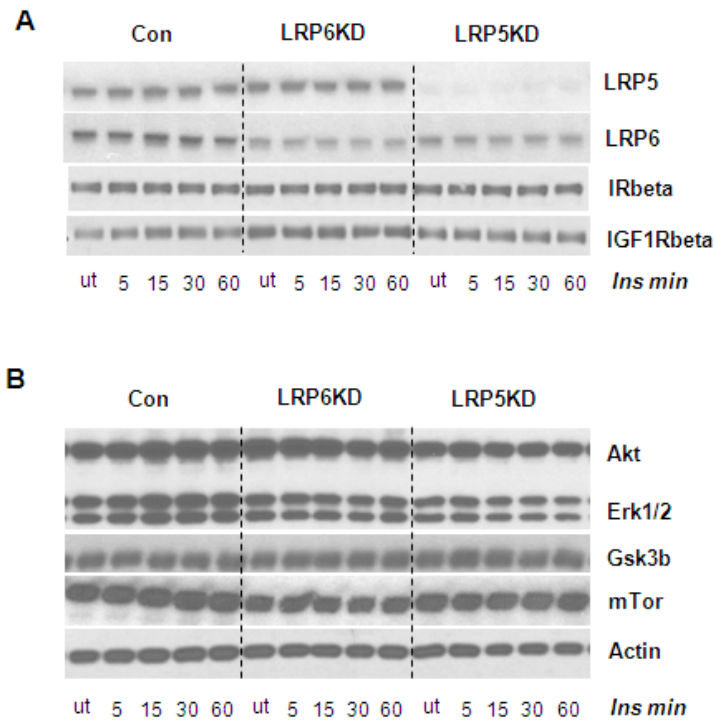

FIGURE S4. Total protein levels in control, LRP5 KD, and LRP6 KD preadipocytes. A, Total protein determination for LRP5, LRP6, IR, and IGF1R in control, LRP5KD, and LRP6KD preadipocytes. B, Total protein determination of Akt, ERK1/2, GSK3 β , and mTOR in control and KD cells. Cells were stimulated with 100 nM insulin and the phosphorylation response can be seen in Figure 6.
