

Supplemental Figure : S1

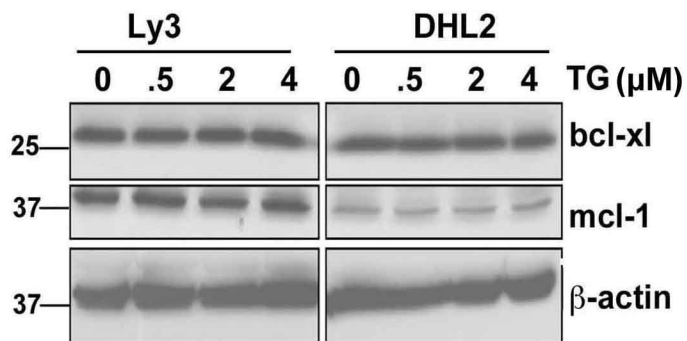

S1: Serum starved Ly10 cells were treated with rIL-10 and c-myc expression was assessed by Q-RT-PCR

Supplemental Fig: S2

S2: Serum starved pJAK2 + (DHL2 and Ly10) and pJAK2- (DHL6) DLBCL lines were treated with rIL-10 (100ng/ml) for 72 hrs and proliferation was assessed by thymidine incorporation assay as described before¹⁶

Supplemental Fig: S3

S3: Ly3 and DHL2 cells were treated with various concentrations of TG and protein expression of bcl-xl and mcl-1 was assessed by immunoblotting.
