

Figure S3 (a) Time-lapse images of cells incubated with R12-Alexa488 (5 μ M) in serum-free medium [α -MEM(-)] at 15°C. Arrows indicate peptide influx points (fluorescence imaging for Alexa488) and membrane particles (DIC imaging). (b) Significant influx of the R4-Alexa488 peptide and particle structure formation were not detected in cells incubated with R4-Alexa488 (15 μ M). Scale bar = 20 μ m.
