

Noda et al, Figure S1

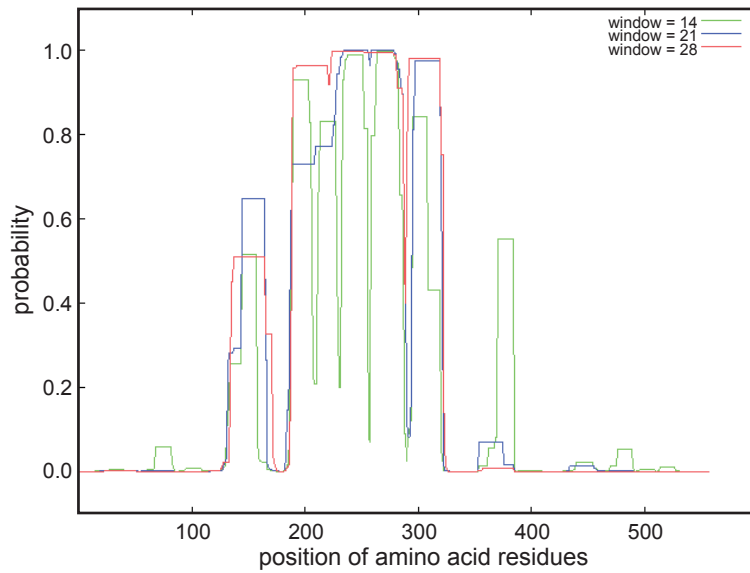

Figure S1 Prediction of a coiled-coil domain in Vps30 using COILS.
(http://www.ch.embnet.org/software/COILS_form.html)

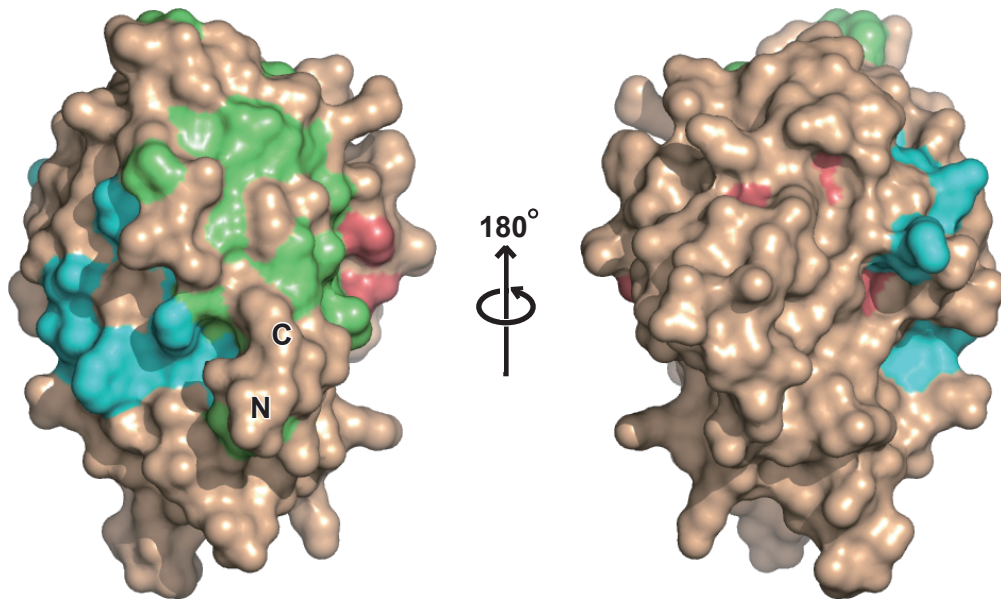

Figure S2 Evolutionarily conserved residues on the surface of Vps30. Structure of Vps30 BARA is shown as a surface model, where conserved residues in repeats 1, 2 and 3 are colored green, red and cyan, respectively. Amino and carboxy termini are labeled N and C, respectively.
