

Supplementary Table S1. Wheat references included in the analysis.

Species (n) ¹	Cultivars included in the study ²
France	
<i>T. aestivum</i> (12)	67510; Athos; Bayard 80240; Blé du Mesnil; Bocquiau; Cloches 32; Hybride à courte paille; Languedoc; Lignée 6696; Renfort; Rex; YGA Blondeau
<i>T. durum</i> (1)	Lez
<i>T. turgidum</i> (16)	Armet; Ixos; Lloyd; Néodur; No 6; Osiris; Pharaons; Senostris IV; Villemur; Géant du Milanais; col. Baillargues I; col. Baillargues II; col. Baillargues III; col. Lac Cécèle; col. Murviel les Montpellier; col. Vendargues
Italy	
<i>T. aestivum</i> (18)	100/M Morgex; Attilio Fabrini; Clavel 2; Conte Marzotto; Falcone J.BO 220; Fortunato; Freccia; Generoso 7; Gentil Rosso 4; Impeto; Jacometti 49; Libellula; Nobel; Roma; S.15 Glutinoso; Salto (Tiriamodiritto); San Pastore; ST.774 Ibrido 440
<i>T. spelta</i> (3)	No 1; col. 43.59°N 11.57°E; col. 44.69°N 10.03°E
<i>T. turgidum</i> (2)	Campania 22; Civitella 204
Spain	
<i>T. aestivum</i> (7)	Aragon 03; Asturie H'3; Caspino 1; Ex Cabezorro; Montsec; Pane 247; Pane 3
<i>T. spelta</i> (2)	AST 17C; AST 9B
<i>T. durum</i> (4)	Candeal; Lucena 45; No 9; Torcal
<i>T. turgidum</i> (5)	Asturie B3; Asturie B4; Asturie H'D; Asturie L2; Asturie L6

¹ Between brackets: number of samples

² Wheat samples that were collected during field collections are marked as "col." - Geographical coordinates (decimal degrees) or location name are given in such cases. *Triticum aestivum* and *T. spelta* and are collectively referred to as hexaploid wheat in the present study. *Triticum durum* and *T. turgidum* are referred to as tetraploid wheat.
