

Supplementary information, Figure S11

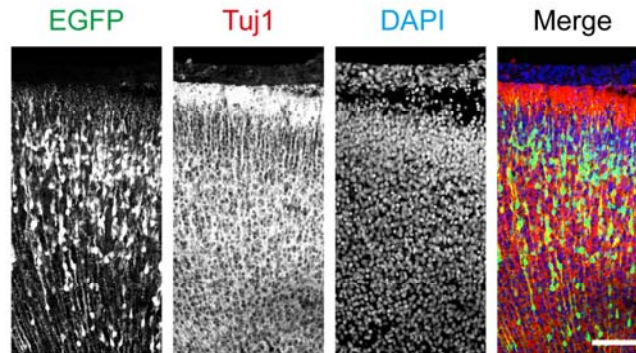

Figure S11 *Itgb1^{ff}* or *Itgb1^{f/+}* mice at E15.5 were subject to *in utero* electroporation with pCAG-IRES-GFP plasmid together with pTurbo-Cre. Cortical sections from P3 mice were stained with antibody against neuronal marker Tuj1 and cell layers were marked by DAPI labeling. Scale bar, 100 μm .
