

**Figure S2. mir-93 is induced in primary tumors with DOX.** 100k pTRIPZ-SUM159-mir-93 cells were injected into the 4<sup>th</sup> fatpads of NOD/SCID mice. Different treatments were initiated (Vehicle Control (Control), DOX alone (DOX), docetaxel alone, or the combination). At the end of treatment, cells from Control and DOX groups were isolated from the tumors and mir-93 expression level was measured by qRT-PCR.
