

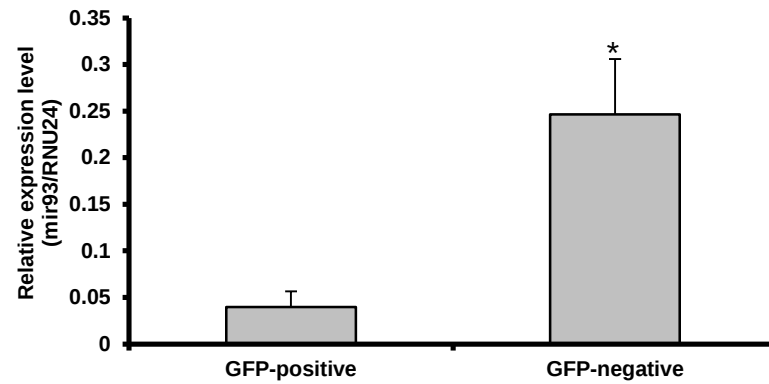

Figure S4. mir-93 expression in Sensor-GFP-positive and Sensor-GFP-negative SUM159 cells.

Mir-93-sensor-GFP SUM159 cells were sorted for GFP-positive and GFP-negative cells by flow cytometry and RNA was isolated from both group of sorted cells and the expression level of mir-93 or RNU24 level was measured by qRT-PCR.

* $p < 0.05$; Error bars represent mean $\pm$ STDEV.
