

Figure S6 Phosphorylation of PaMpk1 and PaMpk2 in ascospores. Ascospores non-induced (NI) and induced (I) for germination were assessed for the phosphorylation of PaMpk1 and PaMpk2. Ascospores were obtained from homozygous wild-type, $\Delta PaNox2$ and $\Delta PaPls1$ crosses. Protein extract from $\Delta PaMpk1$ and $\Delta PaMpk2$ mycelia were loaded as control.
