

Schoville, S.D., J.M. Flowers, and R.S. Burton. 2012. Diversifying selection underlies the origin of allozyme polymorphism at the phosphoglucose isomerase locus in *Tigriopus californicus*

**Table S4.** Inter-population distances at *Pgi* based upon coding regions corrected by the method of Jukes and Cantor (1969). Distances are net between-population means (i.e., corrected for within population distances).
