

Supplemental Table 1. Patient characteristics from MethyLight analysis

	Non-Tumor Associated (NTA)	Tumor and Tumor Associated (T and TA)
Number	11	35
Mean Age	59	59
Mean PSA	-	8.3
Gleason		
3+3	-	5
3+4	-	14
3+5	-	1
4+3	-	1
4+4	-	3
4+5	-	9
5+5	-	1
Stage	-	
T2a	-	1
T2b	-	1
T2c	-	15
T3a	-	3
T3b	-	6

Supplementary Figure 1. Performance of the MethyLight assay for *Evx1* methylation. DNA mixing of methylated LNCaP and unmethylated kidney DNA was performed. LNCaP and kidney was given theoretical methylation values of 100% and 0%, respectively, and plotted against actual methylation measured by MethyLight.

Supplemental Figure 1
