

Table S4: Comparison of Mcm5 and NMP22 test performance in male and female patients

Test	Male		Female		P^a
	n	AUC (CI)	n	AUC (CI)	
Mcm5 ^b	983	0.76 (0.72-0.81)	581	0.75 (0.68-0.82)	0.76
NMP22 ^c	874	0.69 (0.64-0.75)	522	0.80 (0.72-0.88)	0.025

Abbreviations: AUC, area under the curve; CI, 95% confidence interval

^a Chi-squared test comparing AUC values for males vs females

^b Based on 155 and 828 male patients and 55 and 526 female patients respectively with and without UCC

^c Based on 144 and 730 male patients and 51 and 471 female patients respectively with and without UCC
