Results for heroin (n=107) and sedative (n=342) use disorders are not reported due to a small sample size of users.

-----: Not reported due to small cell sizes.

^a There were significant differences in abuse versus dependence ($P<.05$).

^b Any drug includes any of the following: marijuana, inhalants, cocaine, hallucinogens, heroin, analgesic opioids, stimulant, sedatives, and tranquilizers.

Bold face: $P<.05$; results for marijuana, inhalant, cocaine, hallucinogen, stimulant, and tranquilizer use disorders are not reported due to non-significance by race/ethnicity ($P>.05$).

^aEach adjusted logistic regression model of each corresponding disorder included race/ethnicity controlling for age, gender, family income, population density of residence, self-rated health, and survey year.

^bAny drug includes any of the following: marijuana, inhalants, cocaine, hallucinogens, heroin, analgesic opioids, stimulant, sedatives, and tranquilizers.
