

Supplementary Figure:

Fig. S1. The inducible expression of the *upp* gene in *C. glutamicum*. The *upp*-null *C. glutamicum* mutant strain was used as the parental strain for the inducible expression of the *upp* gene from the vector pWYE1088. (A) CGX agar plate containing 5-FU (20 μ M); (B) CGX agar plate containing 5-FU (20 μ M) and 0.02% L-arabinose.
