

Supplemental figure 1

Supplemental figure 1. The knock-down was specific to the target molecule. Pellino 2 knockdown clones (Peli2C1 and Peli2C7) and control cells (scrambled) were subjected to analysis by human Pellino 1/ Pellino 3a/ Pellino 3b quantitative real-time PCR. B. Pellino 1 knockdown clones (Peli1C4) and control cells (scrambled) were subjected to analysis by human Pellino 2/ Pellino 3a/ Pellino 3b specific quantitative Real-time PCR. C. Pellino 2 knockdown BMMs and control BMMs (scrambled) were subjected to analysis by mouse Pellino 1/ Pellino 3a/ Pellino 3b specific quantitative Real-time PCR.
