

Suppl. Figure 3

Suppl. Figure 3. Comparison of global gene expression in UKF-NB-4 cells stored in parallel to primary HCMV infection (UKF-NB-4⁰), UKF-NB-4 cells cultivated in parallel to the chronically HCMV-infected UKF-NB-4 cells (UKF-NB-4²⁰⁰), and chronically HCMV-infected UKF-NB-4 cells (UKF-NB-4^{Hi}) by gene microarray. Hierarchical cluster analysis based on the Pearson correlation coefficient.
