

Suppl. Table 1. Numbers of significantly differentially expressed genes at the mRNA level (FDR < 0.05, corrected for multiple testing) between UKF-NB-4, UKF-NB-4^{Hi}, and UKF-NB-4^{HiGCV} cells as determined by gene microarray analysis.

Cell line comparison	Significantly differentially expressed genes
UKF-NB-4 ^{Hi} vs. UKF-NB-4	8832
UKF-NB-4 ^{HiGCV} vs. UKF-NB-4	8873
UKF-NB-4 ^{Hi} vs. UKF-NB-4 ^{HiGCV}	326
