

695

696 **Figure 1S. Expression of *rpoD* during early development.** QPCR was used to examine the
697 developmental expression levels of *rpoD* in wild type (DK1622) cells. The *rpoD* mRNA levels
698 shown are relative to those found in growing cells (0 hours). The values are means derived from
699 three replicates. The error bars indicate standard errors of the means.
