

1 Supplemental Table 1: Cytotoxicity values of TMC647055 on different cell lines.

Cell line	CC ₅₀ (μM) ¹	n
VeroE6	>100	4
MRC-5	>100	2
HEK293T	50.2	4
HepG2	76.6	5
Huh7	42.1	5
MT4	28.9	16

2 ¹CC₅₀ values are expressed as median values. n = number of independent measurements.

7 Supplemental figure 1: colony formation assay using Huh7-Luc replicon cells incubated with
8 TMC647055 and TMC435, alone or in combination. The images are of cells treated with
9 TMC647055 or TMC435 alone and in combination. The number of observed colonies is
10 indicated.
