

Supplementary Figure 3

Supplementary Figure 3: 11,12-EET Stimulates TRPV4-Mediated Ca²⁺ Events in Endothelial Cells. Mean data showing an increase in the whole-cell (WC) frequency of Ca²⁺ events with addition of 11,12-EET (3 μ M) to the bathing solution compared to vehicle addition (1% DMSO) ($n = 18$ for vehicle, $n = 19$ for 11,12-EET); * $P \leq 0.05$ vs. Vehicle.
