

**Supplemental Table 7: SNP34091 Genotype Comparison Between Retinoblastoma Patients and HapMap Cohort**

<b>Genotype</b>	<i>Black*</i>		<i>White*</i>	
	<b>Patients</b>	<b>HapMap</b>	<b>Patients</b>	<b>HapMap</b>
AA	9	31	14	36
AC	0	19	6	15
CC	3	6	0	3
	<i>p value = 0.0254</i>		<i>p value = 0.8047</i>	

The Mantel-Haenzel test was used to compare genotype frequencies of RB cases to that of HapMap among both whites and blacks while stratifying for race. This test found no significant association ( $p = 0.3926$ ).

\*Subjects of other or mixed racial backgrounds were excluded due to small sample size in our retinoblastoma cohort.
