

SUPPLEMENTARY FIG. S2. Food/water intake in mice. *Fanca*^{-/-} or *Fancc*^{-/-} mice and their wt littermates (6–8 weeks old) were divided into three to four mice per cage, and cumulative food (*left*) or water (*right*) intake was measured as described in Experimental procedures. Values are expressed as means±SD. FANCC, Fanconi anemia complementation group C; WT, wild-type.
