

Figure S3. Effects of anti-Treg antibody treatment on parasite burden in the spleen and bone marrow.

The *L. donovani*-infected *aly/aly* mice were intraperitoneally injected with anti-CD25 or anti-FR4 mAb at 26 WPI, and parasite burden in the spleen (A) and bone marrow (B) was estimated by qPCR after 10 days of antibody treatment. * $p < 0.05$; ** $p < 0.01$.
