

Figure appendix 1: Stevens GA, Finucane MM, Paciorek CJ, et al on behalf of Nutrition Impact Model Study Group (Child Growth). HAZ means and prevalences by country in 2011
 Countries are ordered in the order of their means. The appendix presents the 1985 estimates (pp 88-89) and trends by country (pp 90-231). Prevalence of children with Z scores below -2 includes all children below this cutoff, including those below -3. HAZ=height-for-age Z score. *Countries with no data for which the estimates are based on data in all other countries and on the country-specific covariates that are used in the model.

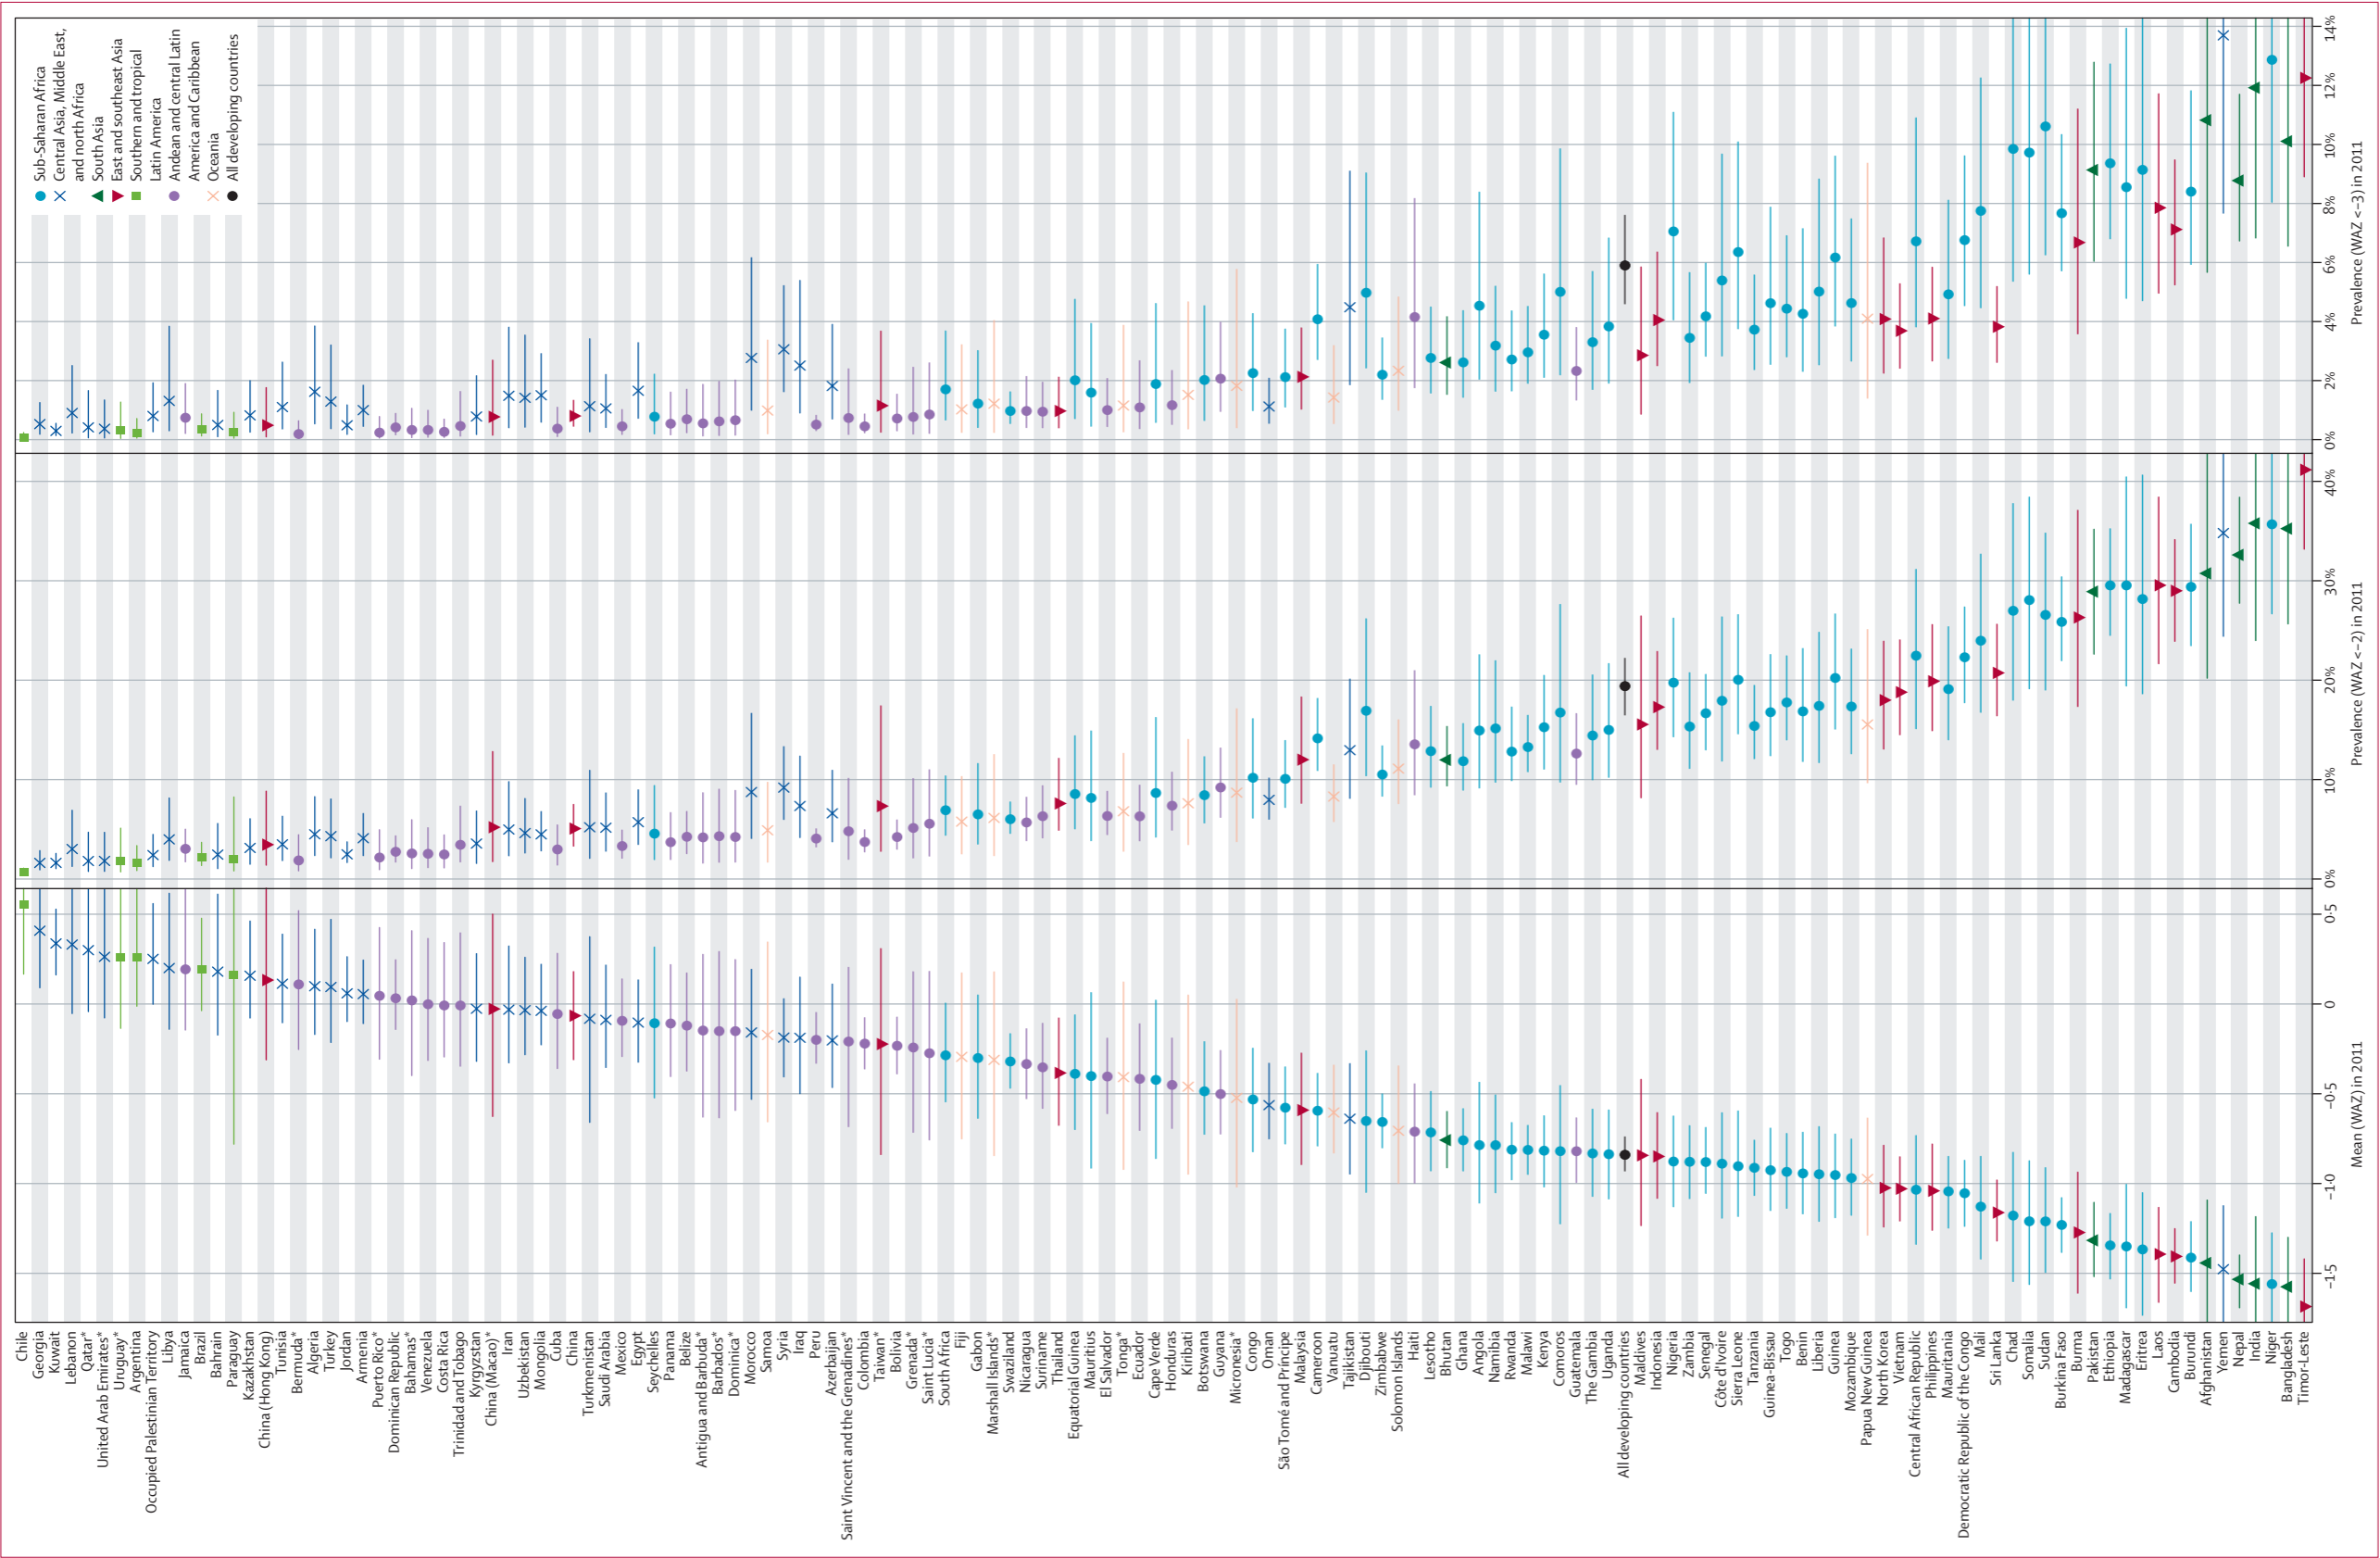

Figure appendix 2: Stevens GA, Finucane MM, Paciorek CJ, et al on behalf of Nutrition Impact Model Study Group (Child Growth). WAZ means and prevalences by country in 2011
 Countries are ordered in the order of their means. The appendix presents the 1985 estimates (pp 88–89) and trends by country (pp 90–231). Prevalence of children with Z scores below -2 includes all children below this cutoff, including those below -3. WAZ=weight-for-age Z score. *Countries with no data for which the estimates are based on data in all other countries and on the country-specific covariates that are used in the model.
