

Table S1. The approximate number of cells in the longitudinal row of epidermis and cortex in the wild type and *er* at an indicated pedicel age (h) as estimated based in pedicel length and the average cell size. For epidermis number of cells corresponds to pavement cells only.

	wt	<i>er</i>	wt	<i>er</i>
age (h)	epidermis	epidermis	cortex	cortex
190	34	21	36	20
240	67	25	74	35
300	75	30	180	69
340	74	33	320	90
