

Supplementary information, Table S1

Genotype	Number of offspring	Expected Mendelian ratio	Actual ratio
+/+	370	1	1
+/-	735	2	1.98
-/-	85	1	0.23

Table S1 Long term breeding statistics from *Cftr* knockout mice. Number of CFTR homozygous knockout (-/-) offsprings born from heterozygous cross is lower than expected (expected ratio: actual ratio = 1: 0.23).
