

Table S2**Y-chromosome qPCR and FISH results in immune-deficient recipients**

Mouse	CEHPOBA	Duration (wk)	% Repopulation by Y-chr qPCR	% Repopulation by Y-chr FISH
NSG	+	3	1.00	2.5
NSG	+	3	0.15	2.5
NSG	+	3	0.12	1.25
NSG	-	3	0.09	0
NSG	-	3	0.08	0

Footnotes: The percentage of Y-chromosome donor marker was quantified by qPCR or FISH from NSG mice transplanted with Hgd^{-/-} hepatocytes, with or without a 3-wk course of CEHPOBA.
