Article Title: Cytochrome P450-mediated oxidative metabolism of abused synthetic cannabinoids found in “K2/Spice”: Identification of novel cannabinoid receptor ligands

Authors: Krishna C. Chimalakonda, Kathryn A. Seely, Stacie M. Bratton, Lisa K. Brents, Cindy L. Moran, Gregory W. Endres, Laura P. James, Paul F. Hollenberg, Paul L. Prather, Anna Radominska-Pandya, Jeffery H. Moran

Journal Title: Drug Metabolism and Disposition

Figure Legend: Mass spectra and MS/MS fragmentation of AM2201 ω -1-OH metabolite. The mass spectra and proposed assignment for fragments observed in the MS2 spectra for the ω -1-OH metabolite (Figure 1) of AM2201. The mass spectra for all other metabolites of JWH-018 have been published previously (Chimalakonda et al., 2011b; Moran et al., 2011).
