

**Table S8** The statistical fit of all possible combinations of explanatory factors in the data set that included OD ratios. Fit of models was statistically compared using maximum likelihood statistics according to the Akaike information criterion (AIC). Models are arranged in the order of best-fitting models (lowest AIC) to poorer fitting models (higher AIC). Inclusion or absence of explanatory variables from models is shown by 1 and 0, respectively.

Tissue	RNA conc.	r26S:18S	RIN	OD 260/280	OD 260/230	Platform	µg RNA sequenced	Bases sequenced	AIC
