positive regulation of Rac GTPase activity
positive regulation of Rho GTPase activity
positive regulation of Ras GTPase activity
regulation of Rho GTPase activity
regulation of Ras GTPase activity
regulation of Rho protein signal transduction
regulation of Ras protein signal transduction
regulation of GTPase activity
positive regulation of GTPase activity
regulation of GTP catabolic process
regulation of purine nucleotide catabolic process
regulation of purine nucleotide metabolic process
regulation of nucleotide catabolic process
regulation of nucleotide metabolic process
positive regulation of protein catabolic process
positive regulation of protein metabolic process
regulation of protein catabolic process
regulation of protein metabolic process
positive regulation of catabolic process
positive regulation of macromolecule metabolic process
regulation of catabolic process
regulation of nucleobase-containing compound metabolic process
regulation of macromolecule metabolic process
regulation of cellular protein metabolic process
regulation of cellular catabolic process
positive regulation of metabolic process
positive regulation of cellular metabolic process
regulation of primary metabolic process
regulation of cellular metabolic process
regulation of nitrogen compound metabolic process
regulation of small GTPase mediated signal transduction
positive regulation of cellular process
regulation of metabolic process
positive regulation of biological process
regulation of signal transduction
regulation of hydrolase activity
positive regulation of hydrolase activity
positive regulation of catalytic activity
regulation of catalytic activity
regulation of transferase activity
negative regulation of transferase activity
negative regulation of catalytic activity
negative regulation of molecular function
regulation of molecular function
positive regulation of molecular function
regulation of signaling
biological regulation
regulation of biological process
regulation of cellular process
regulation of response to stimulus
regulation of localization
regulation of cellular component organization
regulation of cellular component biogenesis
regulation of multicellular organismal process
regulation of developmental process
regulation of cell differentiation
regulation of cell development
regulation of type B pancreatic cell development
negative regulation of type B pancreatic cell development
negative regulation of cell development
regulation of megakaryocyte differentiation
negative regulation of megakaryocyte differentiation
regulation of myeloid cell differentiation
negative regulation of myeloid cell differentiation
negative regulation of cell differentiation
regulation of multicellular organismal development
negative regulation of cellular process
negative regulation of cell activation
negative regulation of exocytosis
negative regulation of secretion
negative regulation of leukocyte degranulation
negative regulation of leukocyte activation
negative regulation of neutrophil degranulation
negative regulation of developmental process
regulation of cell activation
regulation of exocytosis
regulation of secretion
regulation of leukocyte degranulation
negative regulation of immune effector process
regulation of leukocyte activation
negative regulation of transport
negative regulation of immune system process
regulation of cellular localization
regulation of vesicle-mediated transport
regulation of immune system process
regulation of neutrophil degranulation
regulation of myeloid leukocyte mediated immunity
regulation of immune effector process
regulation of transport
regulation of immune response
negative regulation of cellular component organization
regulation of leukocyte mediated immunity
regulation of protein complex assembly
negative regulation of protein complex assembly
regulation of protein complex assembly
ER-nucleus signaling pathway
signal transduction
cell surface receptor signaling pathway
enzyme linked receptor protein signaling pathway
transmembrane receptor protein tyrosine kinase signaling pathway
ERBB signaling pathway
epidermal growth factor receptor signaling pathway
cell communication
cellular response to stimulus
cellular response to stress
cellular response to chemical stimulus
cellular response to organic substance
cellular response to growth factor stimulus
signaling
cellular process
biological_process
metabolic process
nitrogen compound metabolic process
nitrobenzene metabolic process
benzene-containing compound metabolic process
cellular aromatic compound metabolic process
cellular metabolic process
response to stimulus
response to stress
response to chemical stimulus
response to organic substance
response to growth factor stimulus
response to wounding
response to xenobiotic stimulus
response to other organism
response to biotic stimulus
response to external stimulus
locomotion
chemotaxis
taxis
multicellular organismal process
multi-organism process
immune system process
xenobiotic metabolic process
immune effector process
leukocyte mediated immunity
myeloid leukocyte mediated immunity
wound healing
developmental process
multicellular organismal development
anatomical structure development
cerebral cortex development
superior temporal gyrus development
system development
nervous system development
pallium development
telencephalon development
organ development
forebrain development
hippocampus development
limbic system development
brain development
central nervous system development
