

**Table S3. Differences ( $\Delta$ ) in relative percentiles (50<sup>th</sup> percentile in population minus heterozygote percentile) and in absolute levels (noncarriers minus heterozygotes) of apolipoprotein A-I and HDL cholesterol for *APOA1* variants in the Copenhagen City Heart Study and in the Copenhagen General Population Study.**

<i>APOA1</i> variant	Median difference in apolipoprotein A-I				Median difference in HDL cholesterol			
	$\Delta$ Percentiles (50 <sup>th</sup> percentile – heterozygotes)	P-value	$\Delta$ Absolute levels (mg/dL) (noncarriers – heterozygotes)	P-value	$\Delta$ Percentiles (50 <sup>th</sup> percentile in – heterozygotes)	P-value	$\Delta$ Absolute levels (mg/dL) (noncarriers – heterozygotes)	P-value
<b>K12K</b>								
CCHS n=4	11 (-23 to 32)		8 (-36 to 38)		19 (2 to 36)		0.22 (0 to 0.52)	
CGPS n=16	18 (-1 to 35)	0.67	16 (8 to 24)	0.29	13 (-11 to 30)	0.60	0.18 (0 to 0.37)	0.77
<b>S25S</b>

CGPS n=12	45 (43 to 49)	0.80	47 (34 to 61)	0.64	48 (49 to 46)	0.90	0.85 (0.70 to 1.01)	0.65
<b>A164S</b>								
CCHS n=24	-7 (-30 to 21)		-2 (-14 to 8)		4 (-32 to 26)		0.00 (-0.20 to 0.20)	
CGPS n=108	-1 (-28 to 22)	0.59	-1 (-6 to 4)	0.50	-3 (-29 to 17)	0.59	-0.04 (-0.12 to 0.05)	0.70
<b>A190A</b>								
CCHS n=5	22 (4 to 39)		17 (-1 to 36)		0 (-3 to 39)		0.20 (-0.10-0.50)	
CGPS n=16	-7 (-26 to 16)	0.09	-2 (-14 to 11)	0.22	-2 (-22 to 17)	0.32	0.04 (-0.13-0.22)	0.50

Differences in relative percentiles are shown as medians (interquartile range) between the 50<sup>th</sup> percentile in the population and heterozygotes for a given variant, and differences in absolute levels as median differences (95% confidence interval) between noncarriers and heterozygotes in the Copenhagen City Heart Study (CCHS) and the Copenhagen General Population Study (CGPS). P-values comparing relative percentile differences and absolute differences in the CCHS and CGPS by, respectively, Mann-Whitney U-test and z-test.
