

SUPPLEMENTARY FIG. S7. Relative levels of synthetic TP *in vivo*. (A) Levels of TP-319 and (B) levels of TP-500 in the liver and brain of WT and Nrf2 KO mice following two doses of 4 μ mol of TP-319 administered 12 h apart by oral gavage and measured 9 h after the last dose. Bars represent mean \pm SDEV ($n=5$ mice per group for each time point).
