

supplementary information, Figure S10

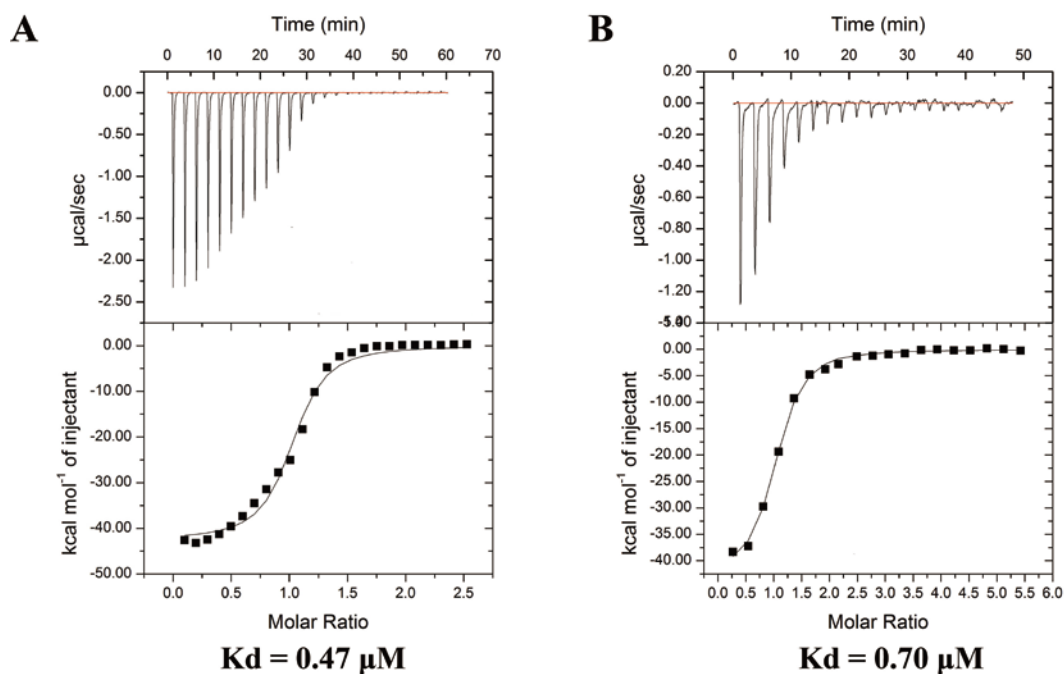

Figure S10 The dTale2 proteins bind to specific dsDNA. **(A)** The dTale2 (148-610) protein binds to specific dsDNA2. **(B)** The dTale2 (148-766) protein binds to specific dsDNA2. The curves in the lower panels are the best fit to a one-set-of-sites binding model. The derived dissociation constants K_d are indicated.
