

Supplemental Material to:

**Gordon M Bennett, Norma A Pantoja and Patrick M
O'Grady**

**Diversity and phylogenetic relationships of Wolbachia in
Drosophila and other native Hawaiian insects**

Fly 2012; 6 (4)

<http://dx.doi.org/10.4161/fly.21161>

<http://www.landesbioscience.com/journals/fly/article/21161/>

1 **SI Table 1.** Annotated list of all *wsp* alleles included in this study. The four-digit barcode
2 (e.g., 001w) corresponds to terminal taxa included in the Maximum Likelihood phylogeny
3 produced in RAxML. GenBank accessions are also provided, with the available taxonomy and
4 collection locality data for each accession. Rows shaded with pink delineate novel Hawaiian
5 phylotyoes generated in this study.

| Barcode | Accession | Wol supergroup | Order | Family | Genus | species | Geography | Pub |
