

**Supplementary Table 4. Primers for cloning the ABCA1 promoter**

<b>Target vector</b>	<b>Forward primer (5' → 3')</b>	<b>Reverse primer (5' → 3')</b>	<b>Amplicon size (bp)</b>
<i>pCR2.1</i>	TGT TCC TCT CGG GTC CTC T	ACT CAC TCT CGC TCG CAA TTA	715
<i>pGL4.10</i>	GCT TTG TTC CTC <u>TGA TAT CCT</u> CTG A	GCA GAA TTA <u>AGC TTA CTC ACT</u> CTC G	733

The engineered EcoRV and HindIII restriction sites in the forward and reverse pGL4.10 cloning primers respectively are underlined.
