

- linear regression of log fitness (generation 0-5)
→ average improvement per generation: 1.8fold
- ▲ linear regression of log fitness (generation 5-10)
→ average improvement per generation: 1.3fold

- linear regression of log fitness (generation 0-5)
→ average improvement per generation: 2.2fold
- ▲ linear regression of log fitness (generation 5-10)
→ average improvement per generation: 1.5fold
