^a – ^m Isolates with the same letter belonged to the same patient. HST, HNRN, and HNLP correspond to bacterial isolates provided by Hospital de Niños de la Santísima Trinidad de Córdoba, Córdoba Province, Hospital Pedro Moguillanski, Cipoletti, Río Negro Province, and Hospital de Niños de La Plata Sor María Ludovica, La Plata, Buenos Aires Province, respectively. ^t Isolates recovered from 2 CF patients from Hospital de Niños de la Santísima Trinidad de Córdoba, Córdoba Province, Argentina. ^u Identification confirmed by *gyrB* gene sequence analysis. ^v Isolates recovered during the outbreak (2004 – 2005). ^w RFLP: Restriction Fragment Length Polymorphism, *Hae*III-*recA*-RFLP. ^x Allele identity was obtained by comparing the sequence of a 398 bp *recA* fragment against the Multi Locus Sequence Typing (MLST) database (<http://pubmlst.org/bcc/>)
