

Table S3: Mutation assay: deep sequence

❖ Sample A: Control original NL4-3 viral total RNA

❖ Sample B: aptamer-stick-siRNA treated mouse J483

When condition: threshold = 1, true (1), mutation >1%

Tat/rev domain (yellow): 4 mutation above 1%

HIV-1 envelop signal domain (grey): 1 mutation above 1%

Gp120 domain (pink) : 6 mutation above 2%

Gp41 domain (blue): 5 mutation above 1%
