

Supplemental Appendix 3. New Scoring Algorithm. The raw domain scores are derived by adding the points for the questions comprising each domain. Where an answer to a question is not assigned a point, the score for that answer is zero. The final domain scores are generated by multiplying the raw score with a weight index (see Table 3). The total score is the sum of all domain scores.

Domain	Item	Answer	Points	
Orthostatic Intolerance	1	1	1	
		2	1	
		3	2	
		4	3	
	3	1	1	
		2	2	
		3	3	
	4	1	3	
		2	2	
		3	1	
	Vasomotor	5	1	1
			1	1
