

**A****B**

**Figure S7. ZMIZ1 appears to regulate C-MYC expression indirectly.** 8946 cells were co-transduced with a construct of ZMIZ1 fused at the C-terminus to the ligand binding domain of the estrogen receptor (ZMIZ1-ER) and the activated NOTCH1 allele L1601PΔP. 4-OHT was added for (A) 48 hours and (B) 6 hours to induce ZMIZ1 activity. In (B), 20 μM cycloheximide (CHX) was also added with OHT for 6 hours. C-Myc RNA levels were analyzed by qPCR relative to control NGFR (set at 100) and normalized to 18S.
