

## Supplementary Tables

In the following supplementary tables we provide, for each comparison: (a) the distribution of the selected voxels in the brain according to the anatomical atlas described in (Hammers et al., 2003; Gousias et al., 2008); (b) the complete lists of SNPs with selection probability  $\geq 0.5$  for the sRRR rank 1, rank 2 and rank 3 analyses.

### AD versus CN

# voxels	Region
3138	Lateral ventricle, frontal horn, central part and occipital horn left
2986	Lateral ventricle, frontal horn, central part and occipital horn right
937	Hippocampus left
907	Hippocampus right
580	Posterior temporal lobe right
402	Posterior temporal lobe left
289	Lateral ventricle, temporal horn right
267	Gyri parahippocampalis et ambiens left
211	Amygdala left
206	Lateral ventricle, temporal horn left
169	Gyri parahippocampalis et ambiens right
156	Caudate nucleus right
133	Amygdala right
101	Lateral occipitotemporal gyrus, gyrus fusiformis right
94	Medial and inferior temporal gyri right
88	Medial and inferior temporal gyri left
84	Caudate nucleus left
71	Third ventricle
64	Superior temporal gyrus, posterior part right
48	Insula right
44	Anterior temporal lobe, medial part left
35	Superior temporal gyrus, posterior part left
32	Precentral gyrus right
27	Corpus callosum
20	Cingulate gyrus, posterior part right
18	Inferior frontal gyrus right
16	Frontal lobe right, becomes middle frontal gyrus after subdivision of frontal lobe
11	Lateral orbital gyrus left
9	Lateral occipitotemporal gyrus, gyrus fusiformis left
9	Insula left

9	Parietal lobe left
9	Anterior temporal lobe, medial part right
9	Superior parietal gyrus left
6	Occipital lobe right
5	Cingulate gyrus, anterior part left
5	Superior frontal gyrus left
5	Postcentral gyrus right
3	Superior temporal gyrus, anterior part right
2	Thalamus left
1	Cingulate gyrus, posterior part left
1	Thalamus right
1	Posterior orbital gyrus left

Table 1: The distribution of the selected voxels in the brain, from the AD versus CN comparison. Among the 11394 selected voxels, 186 were labelled as background in the atlas used.

Table 6: SNPs with maximum selection probabilities  $\geq 0.5$  (ranked according to their selection probabilities) for rank 1, 2 and 3 of the P-MCI versus S-MCI sRRR analysis. For each marker also provided are: the corresponding gene annotation, where applicable, the chromosome, the MAF, the HWE *p*-value and the selection probability.
