

Supplementary Figure 1. LAMP-1 Expression in Fallopian Tissue. LAMP-1 expression in normal fallopian tissue (A-B) and in serous papillary fallopian adenocarcinoma tissue (E-F). An adjacent section of normal (C-D) and serous adenocarcinoma (G-H) was stained with hematoxylin and eosin (H&E) to denote epithelial cells. LAMP-1 is expressed within the epithelial cells of fallopian fimbriae in serous adenocarcinoma.

Supplementary Figure 1
