

Supplemental Material

Thyroid Hormones in Relation to Lead, Mercury, and Cadmium Exposure in the National Health and Nutrition Examination Survey, 2007–2008

Aimin Chen¹, Stephani S. Kim¹, Ethan Chung¹, Kim N. Dietrich¹

¹Division of Epidemiology and Biostatistics, Department of Environmental Health, University of Cincinnati College of Medicine, Cincinnati, Ohio, USA

Table of Contents

Table S1: Adjusted regression coefficients and 95% confidence intervals of blood and urinary lead, mercury, cadmium quintiles in relation to thyroid hormones in adolescents

Table S2: Adjusted regression coefficients and 95% confidence intervals of blood and urinary lead, mercury, cadmium quintiles in relation to thyroid hormones in adults

Table S3: Adjusted regression coefficients and 95% confidence intervals of blood and urinary lead, mercury, cadmium in relation to thyroid hormones in women of reproductive age (15-44 years)

Table S4: Adjusted regression coefficients and 95% confidence intervals of cumulative exposure to lead, mercury, and cadmium in relation to thyroid hormones in adults

Supplemental Material, Table S1. Adjusted regression coefficients and 95% confidence intervals of blood and urinary lead, mercury, cadmium quintiles in relation to thyroid hormones in adolescents^a
