

Table S1. Growth of *S. enterica* and *Pcc* in lettuce leaf lysate.

Treatment	Strain	Population	
Aerobic			
<i>S. enterica</i>	<i>S. enterica</i>	8.69±0.04	*
<i>S. enterica</i> + <i>Pcc</i> WT	<i>S. enterica</i>	9.03±0.13	
<i>Pcc</i> WT	<i>Pcc</i> WT	8.88±0.06	*
<i>S. enterica</i> + <i>Pcc</i> WT	<i>Pcc</i> WT	8.54±0.12	
MAP			
<i>S. enterica</i>	<i>S. enterica</i>	8.01±0.09	
<i>S. enterica</i> + <i>Pcc</i> WT	<i>S. enterica</i>	7.80±0.13	
<i>Pcc</i> WT	<i>Pcc</i> WT	8.24±0.15	*
<i>S. enterica</i> + <i>Pcc</i> WT	<i>Pcc</i> WT	7.85±0.18	

Note: Data shown are the means of 3 replicates from representative experiments. The experiment was repeated three times. Statistical analysis was performed using ANOVA and statistically significant ($p < 0.05$) comparisons are indicated with an asterisk (*).
