

## SUPPLEMENTARY DATA

TABLE S1. Data used for our regression analysis of temperature optima of net photosynthesis in relation to mean habitat temperature of the respective growing season, based on 19 studies on 61 bryophyte species from a wide range of ecosystems: polar, alpine, temperate, desert and tropical regions. Growing-season temperatures are based on data from the nearest climate station (monthly averages from 1970–2009 or less). Mean temperatures of the study sites were adjusted according to altitude (moist adiabatic lapse rate: 0.6 °C per 100 m). When altitude was not specified we assumed sea level. Where results were ranges we chose the arithmetic mean of the range for the analysis. We averaged optimum temperatures where species showed seasonal acclimation. If species were studied more than once, i.e. at different altitudes or latitudes, we averaged the optimum temperature and the mean temperature of the study sites for the regression analysis in order to avoid including several data points for the same species as though these were independent. Climate data were taken from NOAA (<http://gis.ncdc.noaa.gov/map/cdo/?thm=themeMonthly>), from the original article (Pannewitz *et al.* 2005) or from our own measurements. All studies measured net photosynthesis at normal atmospheric CO<sub>2</sub> concentrations and at close to saturating irradiances.

Species	Optimum temperature of NP (°C)	Mean temperature of growing season (°C)	Definition of growing season	Altitude (m a.s.l)/Mean temperature lapse rate adapted?	Study region	Nearest climate station found/altitude (m a.s.l.)	System used	Reference
<i>Atrichum undulatum</i>	15.0	14.6	April–October	N/A	Southern Germany	Ohringen, D /276	Not specified	Seidel 1976*(in Proctor 1982)
<i>Bryopteris filicina</i>	24.6	22.0	Whole year	500	Panama	Own measurement	GFS 300 (Walz GmbH)	Present study
<i>Bryum pseudotriquetrum</i>	12.0	-2.4	Summer	N/A	Antartica	Pannewitz <i>et al.</i> 2005 (found in Rudolph 1966)	compact mini-cuvette systems (CMS4P, Walz GmbH)	Pannewitz <i>et al.</i> 2005
<i>Bryum subrotundifolium</i>	13.9	-2.4	Summer	N/A	Antartica	Pannewitz <i>et al.</i> 2005 (found in Rudolph 1966)	compact mini-cuvette systems (CMS4P, Walz GmbH)	Pannewitz <i>et al.</i> 2005
<i>Ceratodon purpureus</i>	6.6	-2.4	Summer	N/A	Antartica	Pannewitz <i>et al.</i> 2005 (found in Rudolph 1966)		Pannewitz <i>et al.</i> 2005
<i>Dicranum fuscescens</i>	11.25	6.2	April–October	260/Yes	Mary Jo, Schefferville, Quebec, Canada	Schefferville airport, CA/522	Beckman 215A (IRGA, differential mode)	Hicklenton and Oechel 1976
<i>Dicranum fuscescens</i>	11.25	3.2	April–October	750/Yes	Timmins, Schefferville, Quebec, Canada	Schefferville airport, CA/522	Beckman 215A (IRGA, differential mode)	Hicklenton and Oechel 1976
<i>Dicranum longatum</i>	5	5.6	April–October	N/A	Kevo, FI	Karasjok/130	IRGA	Kallio and Heinonen 1975
<i>Dicranum scoparium</i>	12.0	14.6	April–October	N/A	Southern Germany	Ohringen, Germany /276	Not specified	Seidel 1976*(in Proctor 1982)
<i>Dicranum majus</i>	20.0	13.0	April–October	N/A	SW-England, UK	Camborne, UK/88	Not specified	Proctor 1982
