

# Supporting Information

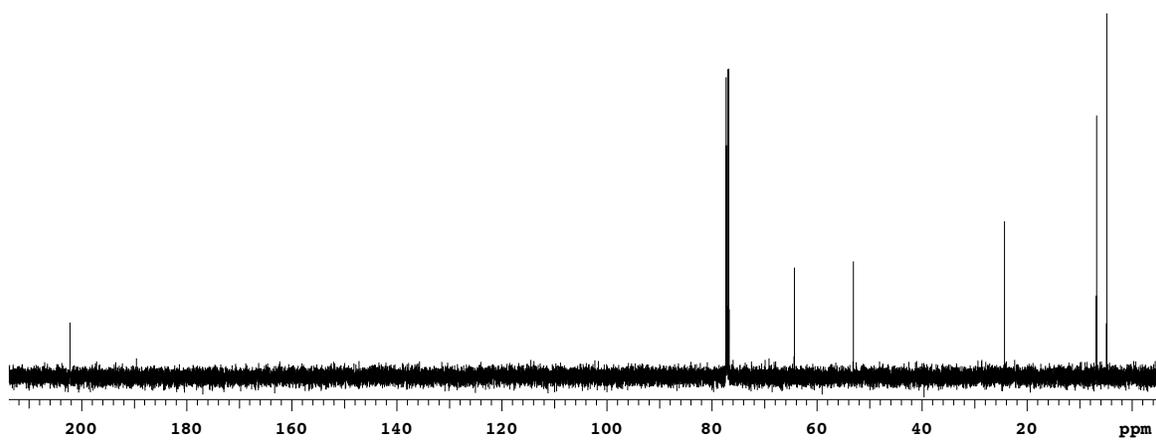

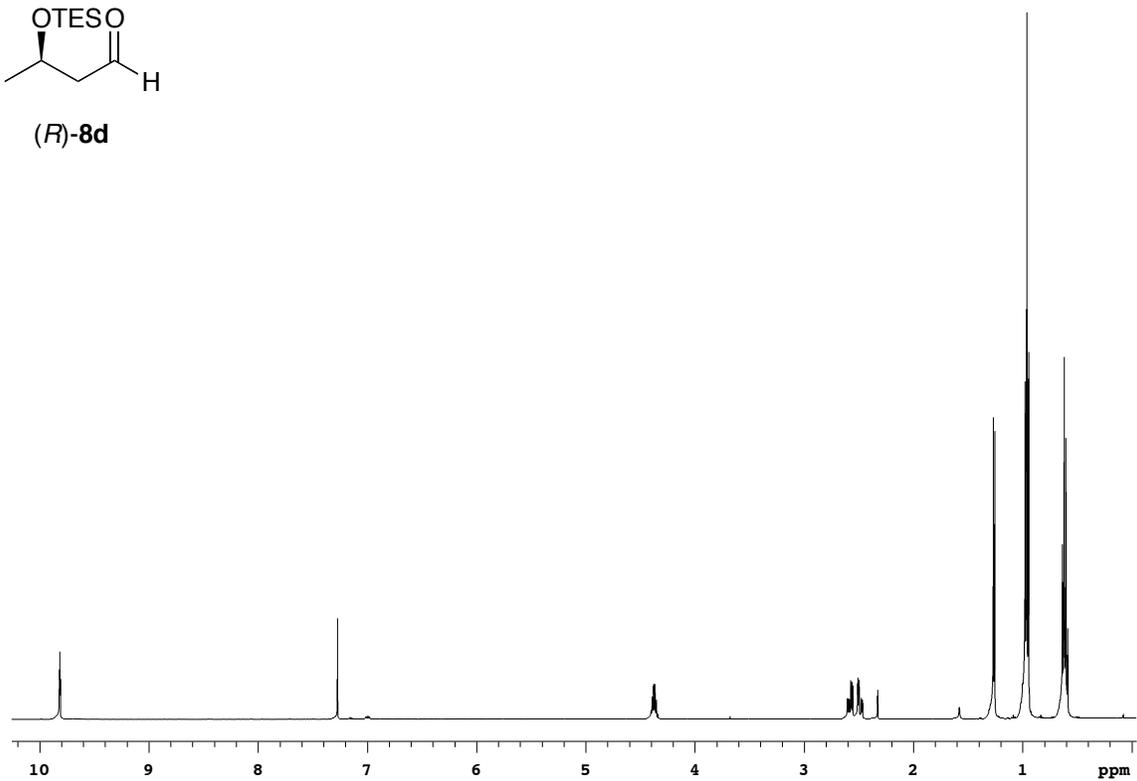

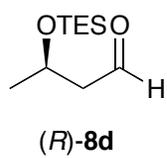

## Total Synthesis of Sedum Alkaloids via Catalyst Controlled aza-Cope Rearrangement and Hydroformylation with Formaldehyde

Hong Ren and William D. Wulff\*

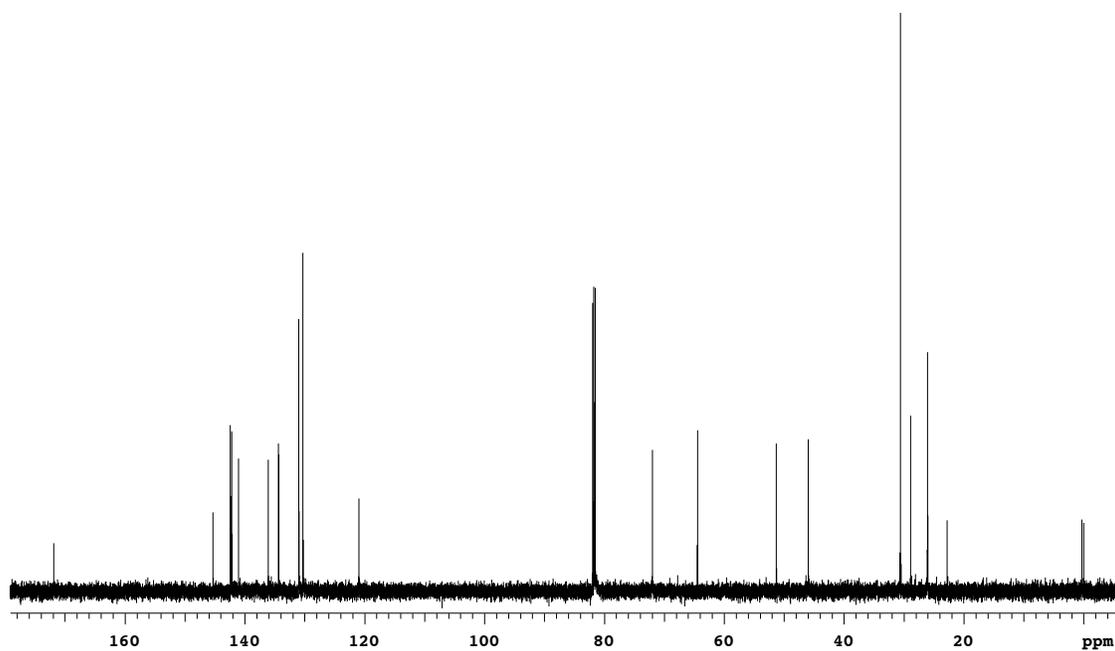

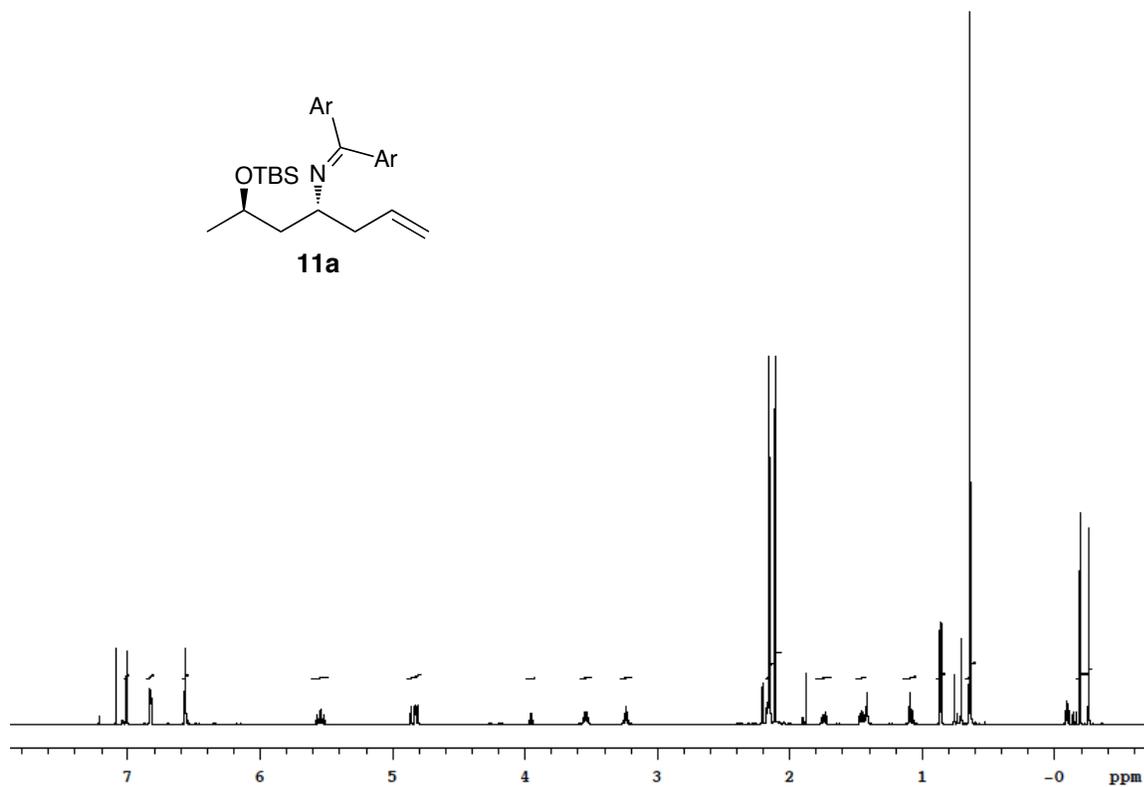

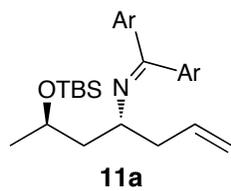

*Department of Chemistry, Michigan State University  
East Lansing, MI 48824  
E-mail: wulff@chemistry.msu.edu*

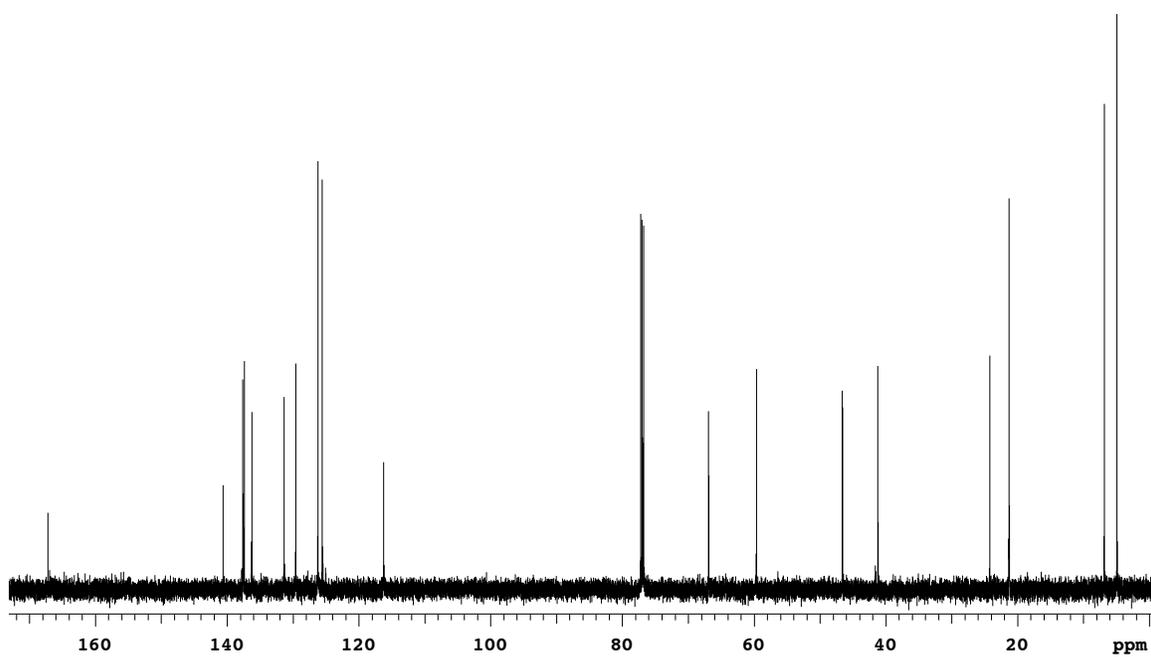

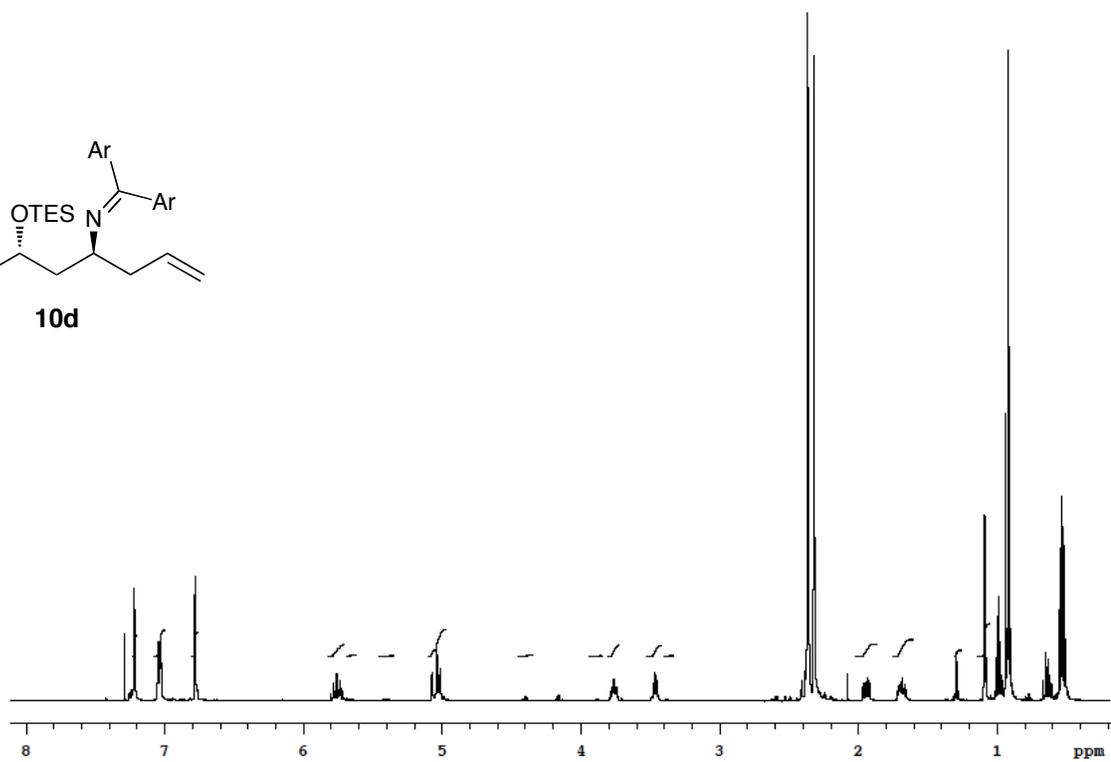

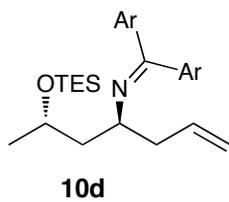

### Table of Contents

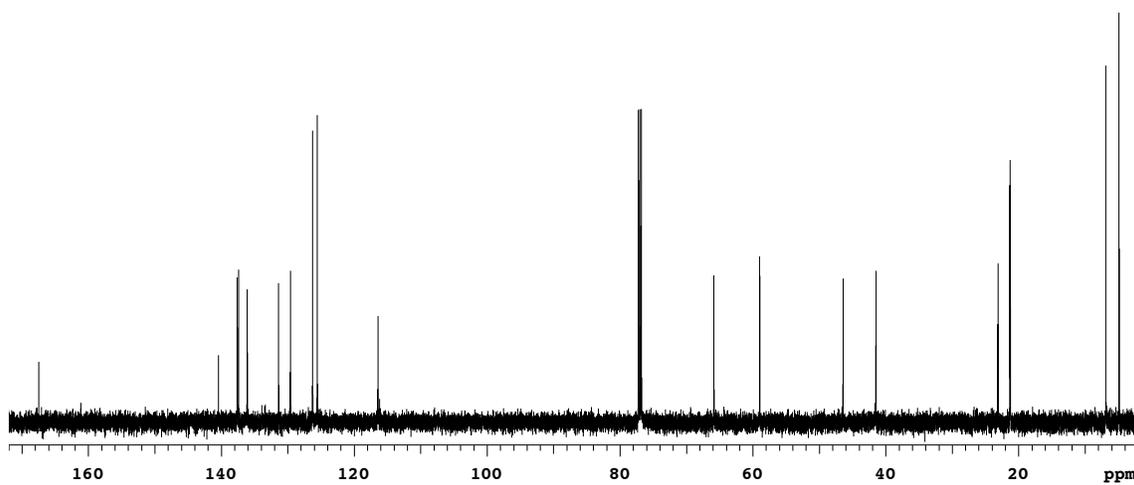

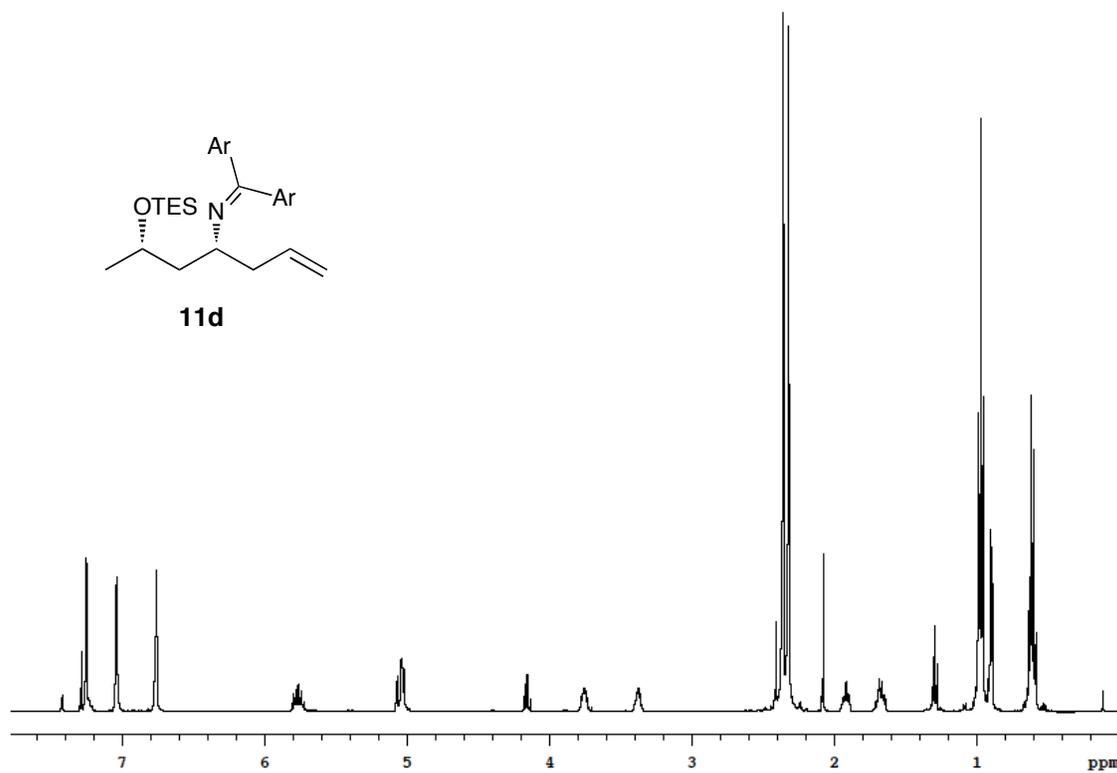

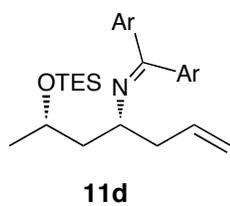

NMR spectra for compound <b>8d</b> .....	2
NMR spectra for enriched compound <b>10a</b> .....	3
NMR spectra for enriched compound <b>11a</b> .....	4
NMR spectra for enriched compound <b>10d</b> .....	5
NMR spectra for enriched compound <b>11d</b> .....	6
NMR spectra for a mixture of <b>14</b> and <b>15</b> (12:1).....	7
NMR spectra for compound <b>16b</b> .....	8
NMR spectra for compound <b>17a</b> .....	9
NMR spectra for compound <b>17b</b> .....	10
NMR spectra for compound <b>19</b> .....	11
NMR spectra for compound <b>20</b> .....	12
NMR spectra for compound <b>22</b> .....	13
NMR spectra for compound <b>23</b> .....	14
NMR spectra for compound <b>24</b> .....	15
NMR spectra for compound <b>25</b> .....	16
NMR spectra for compound (+)- <b>allosedridine</b> .....	17
NMR spectra for compound <b>26</b> .....	18
NMR spectra for compound <b>27</b> .....	19
NMR spectra for compound <b>28</b> .....	20
NMR spectra for compound (+)- <b>sedridine</b> .....	21

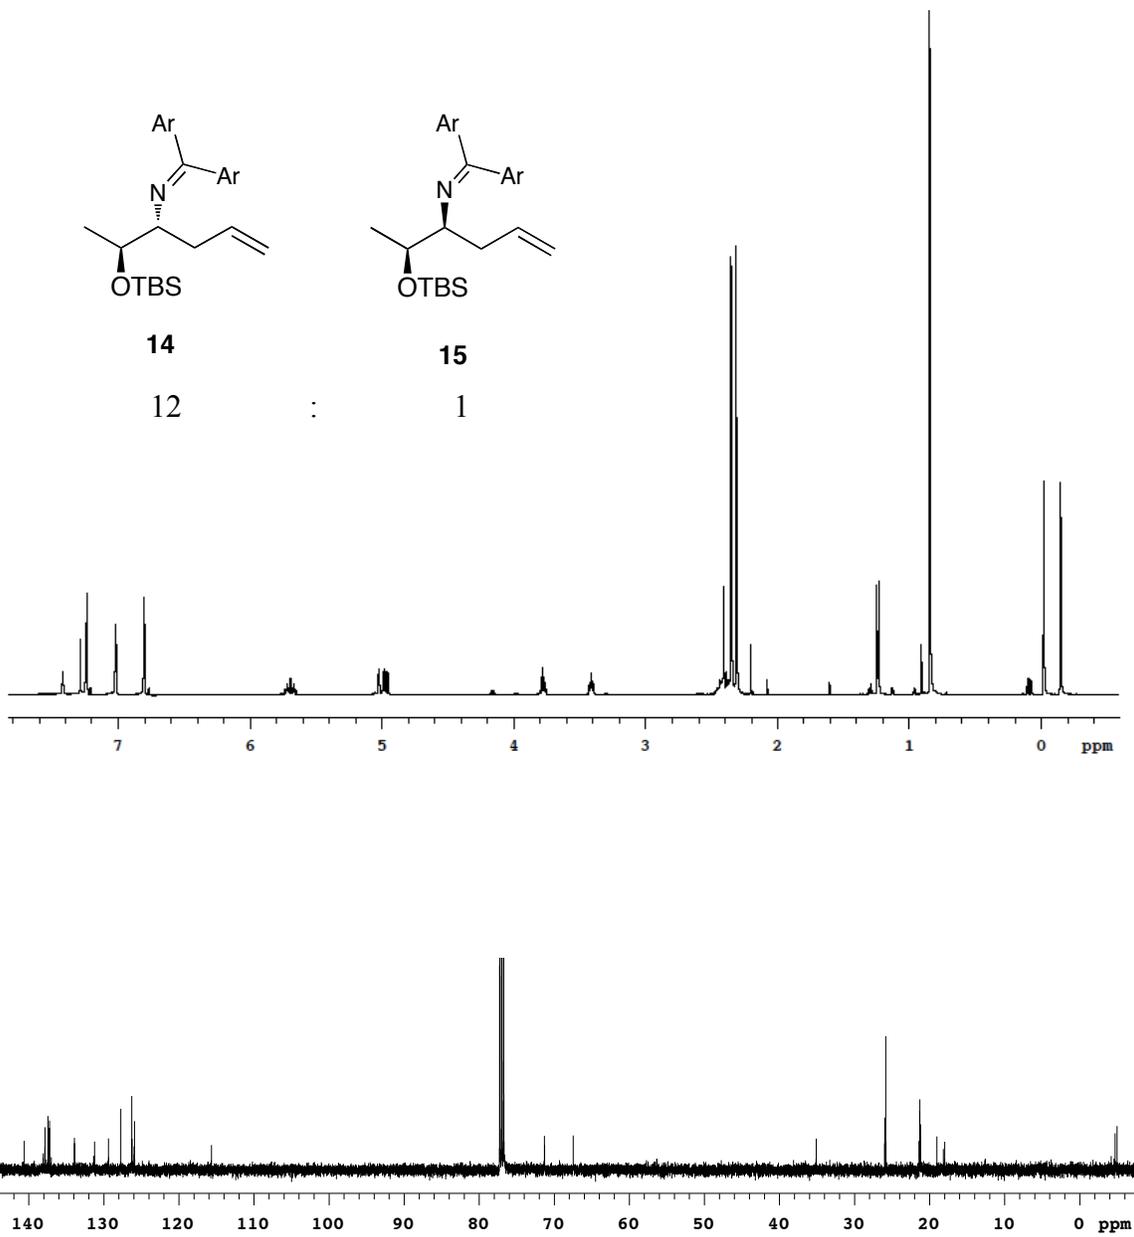

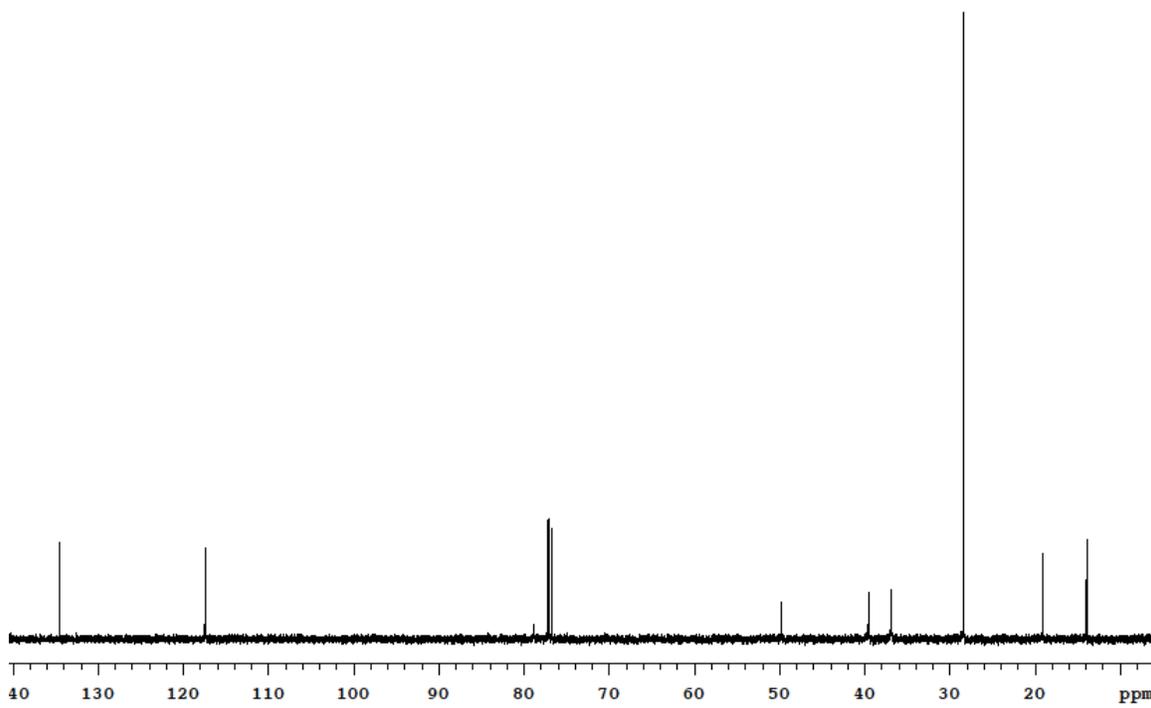

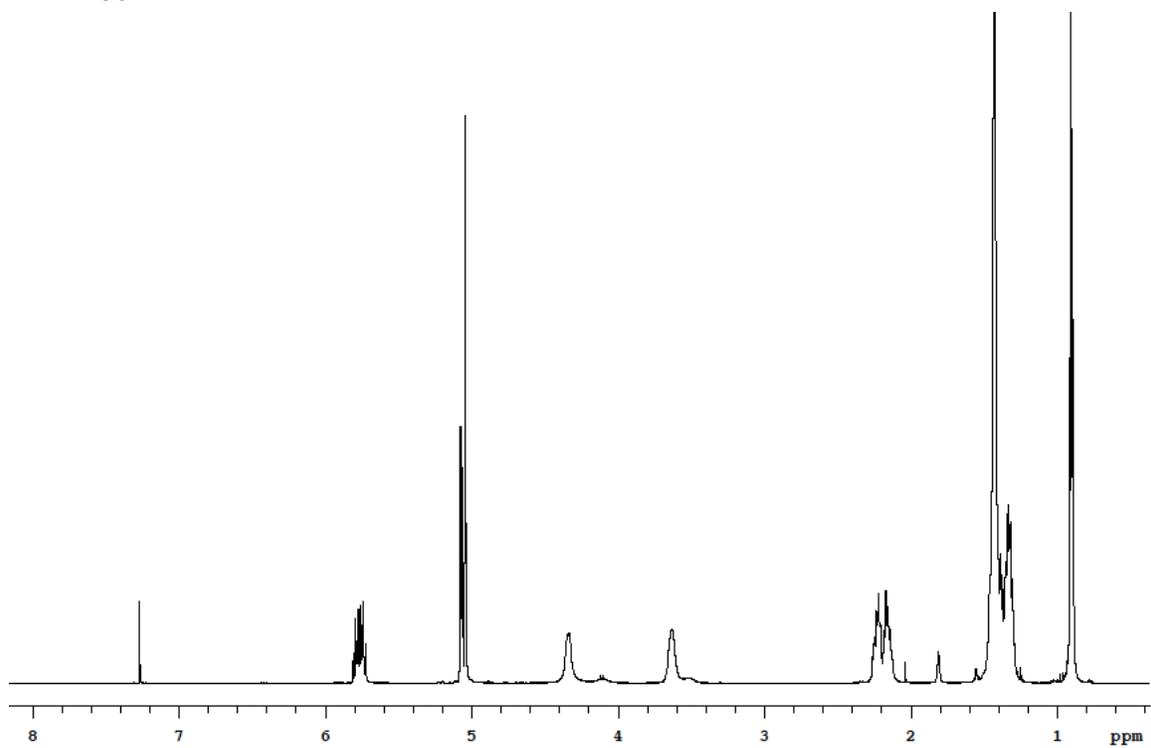

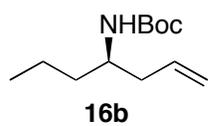

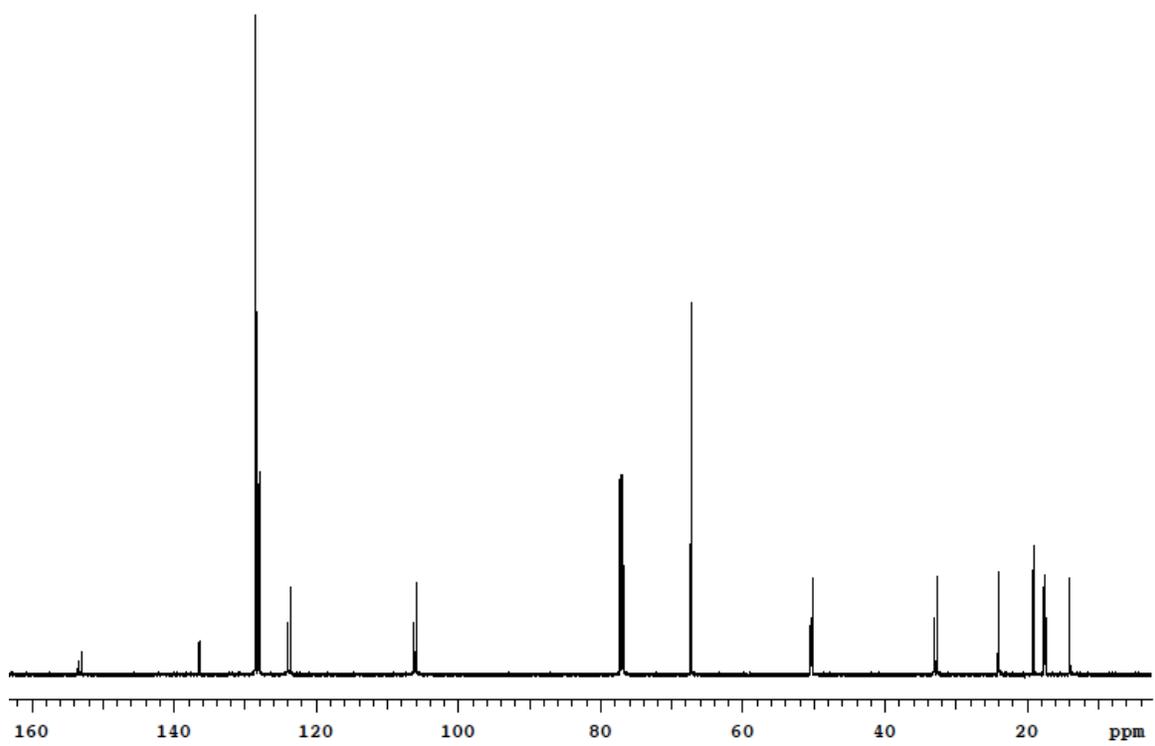

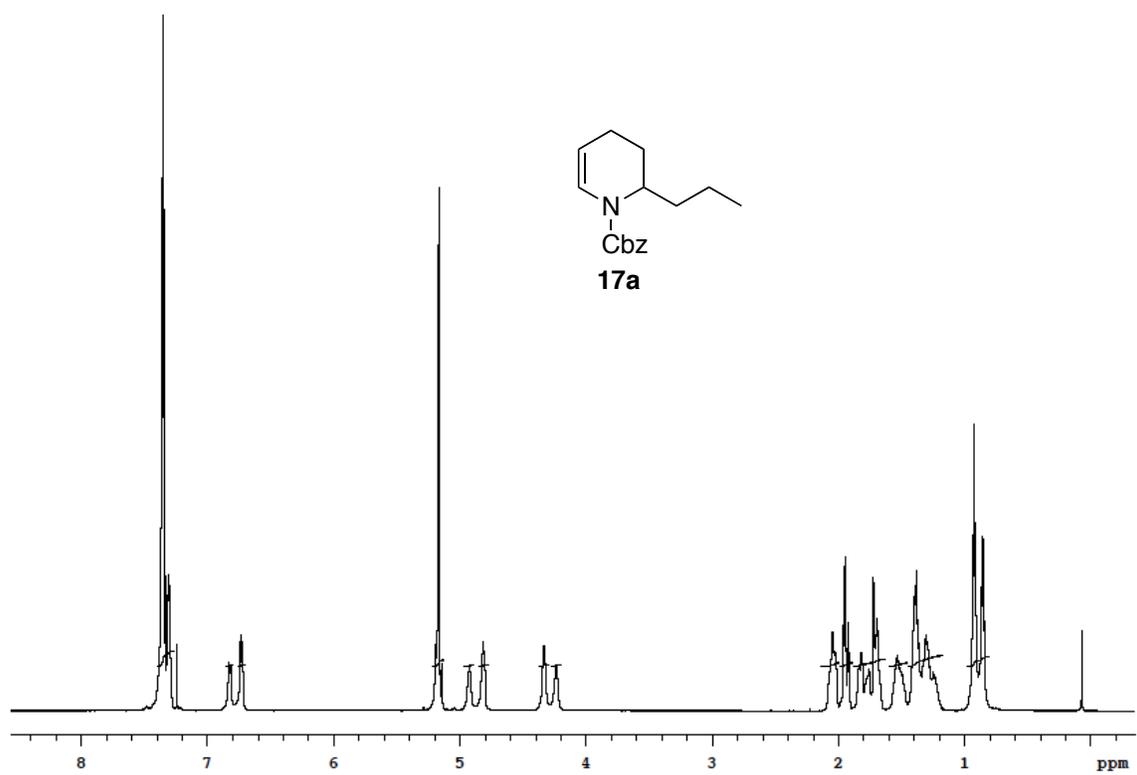

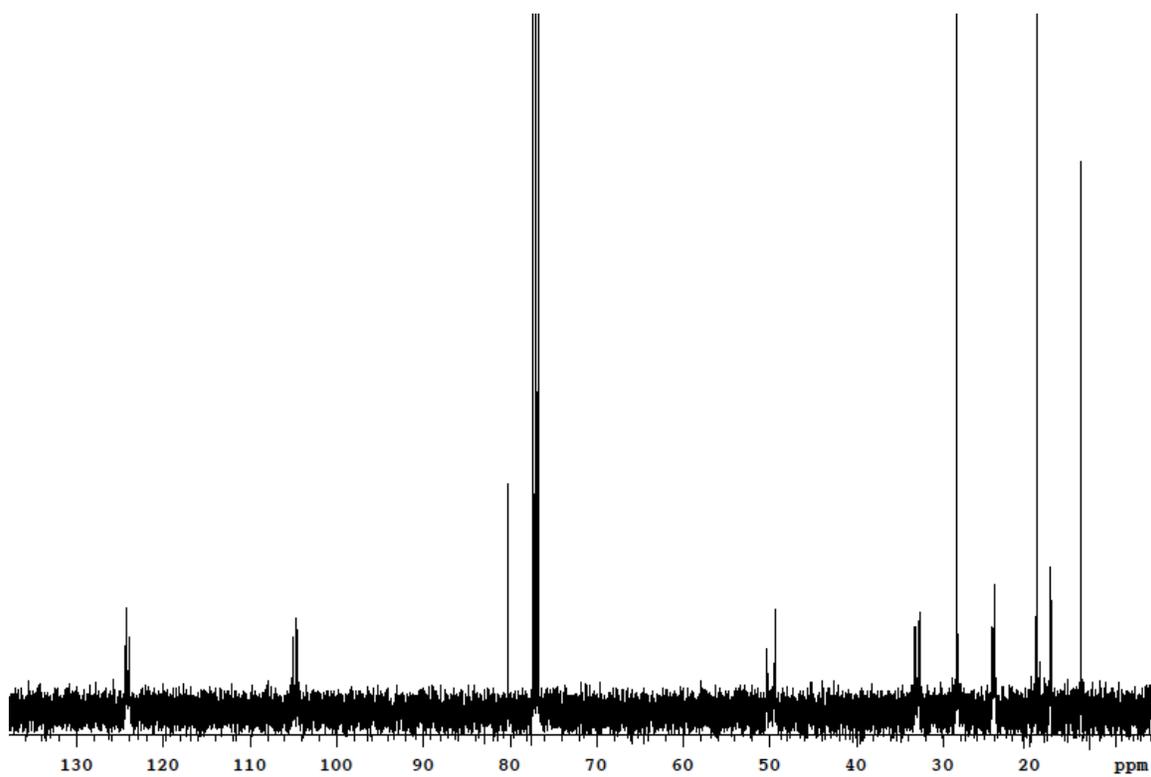

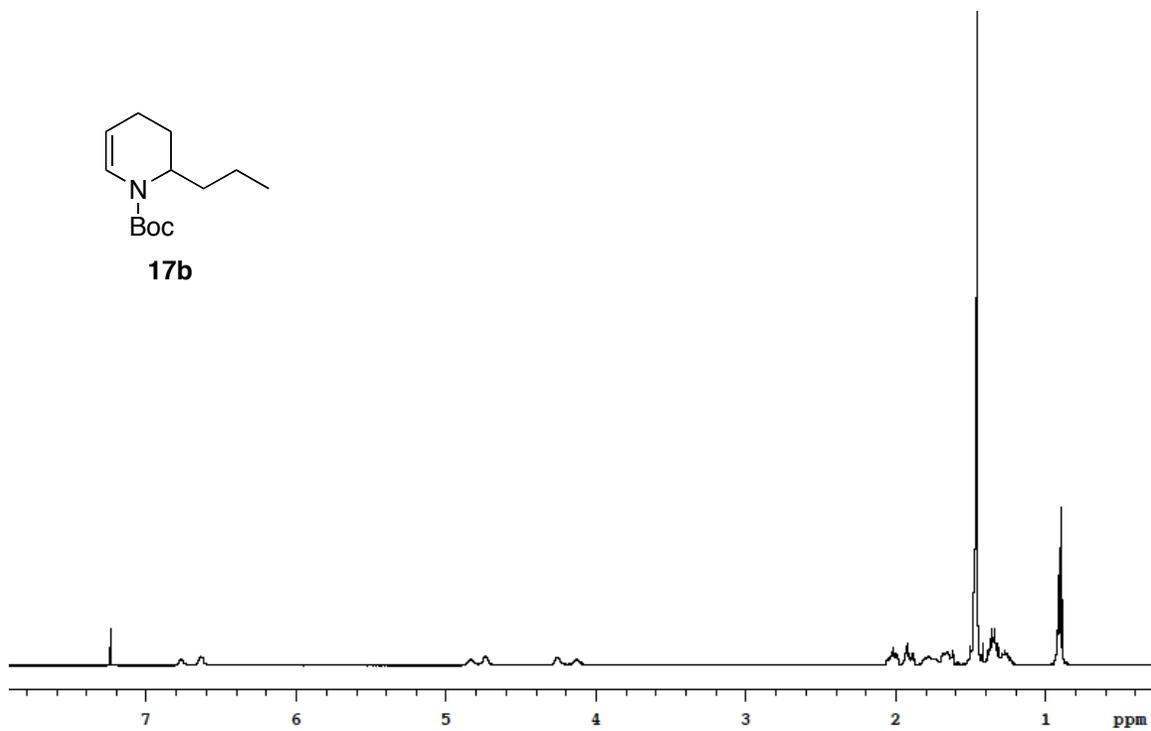

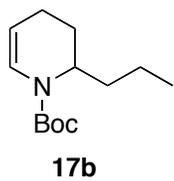

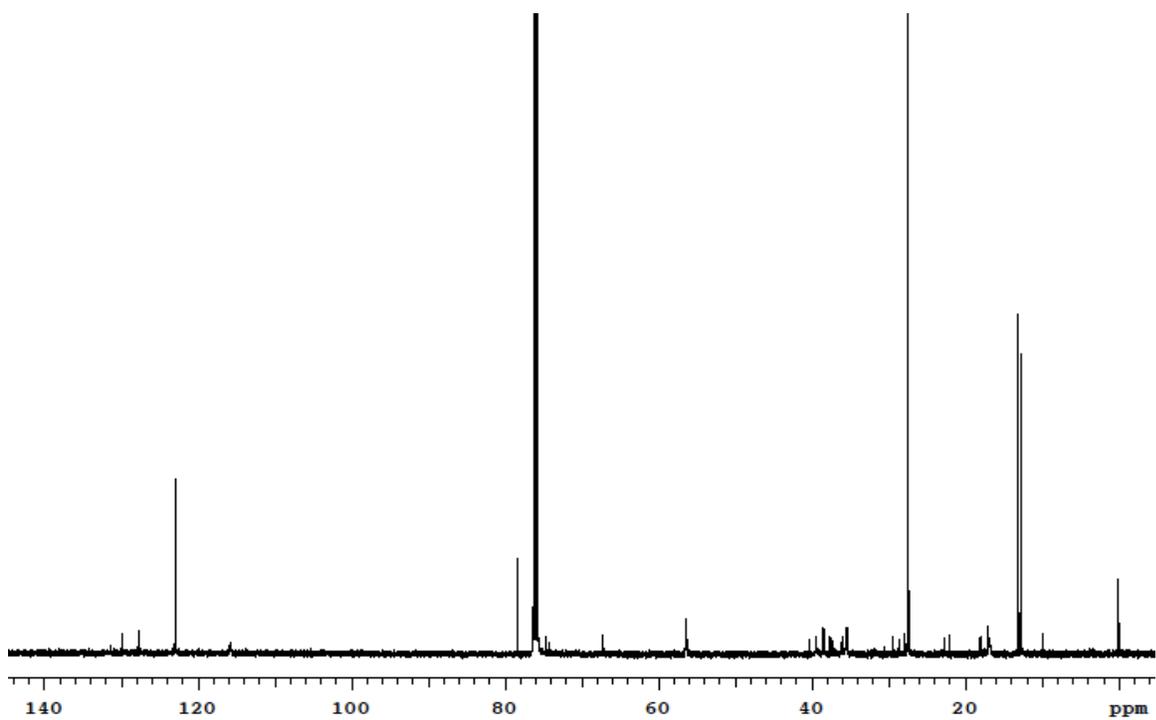

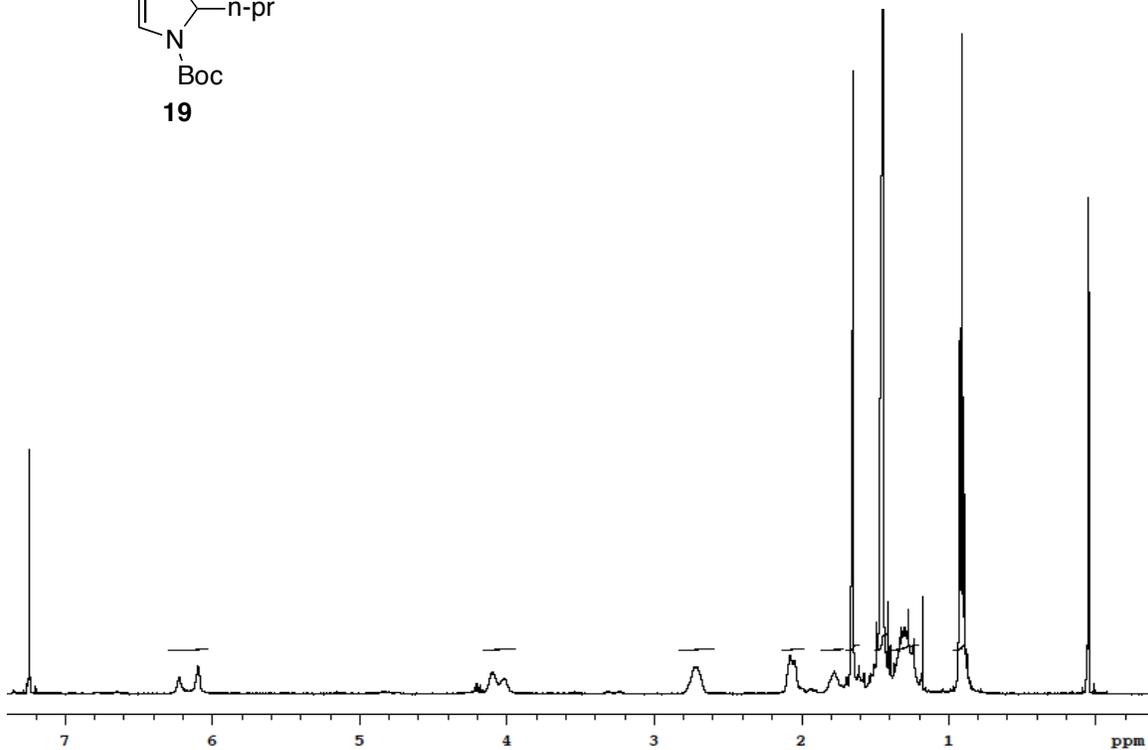

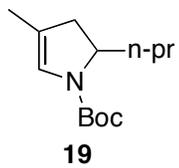

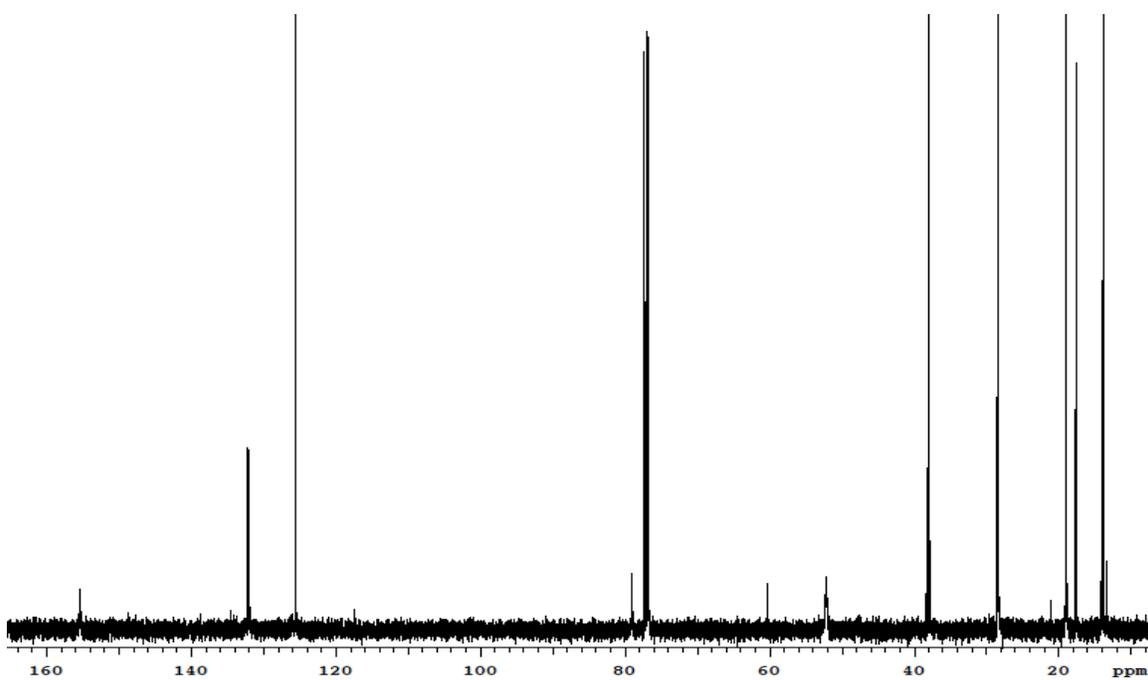

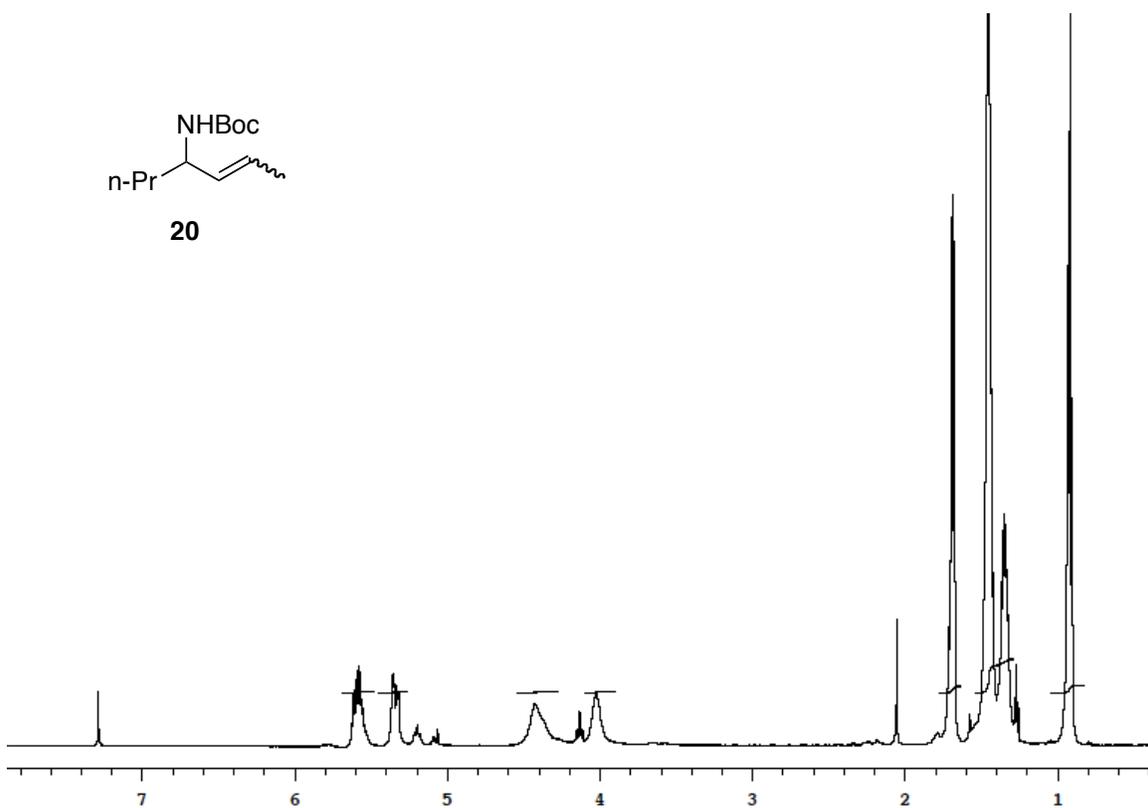

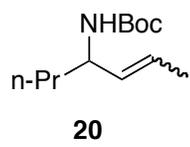

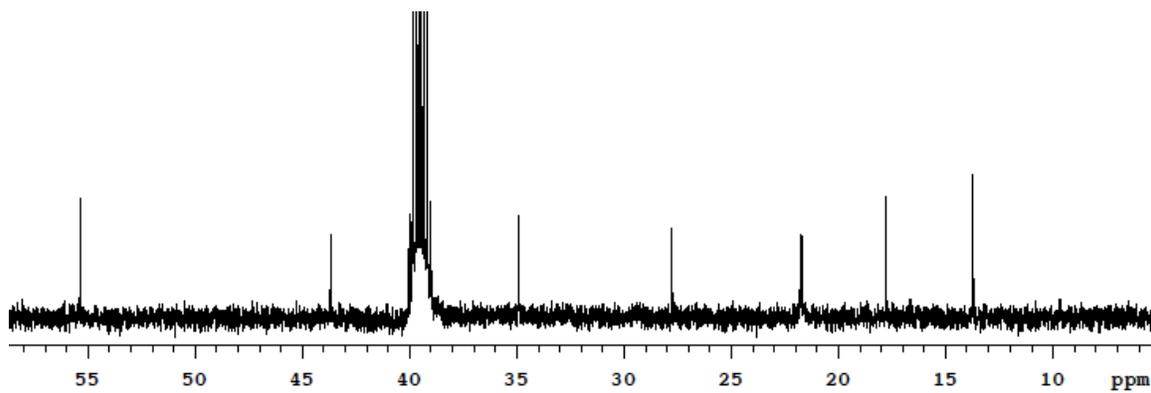

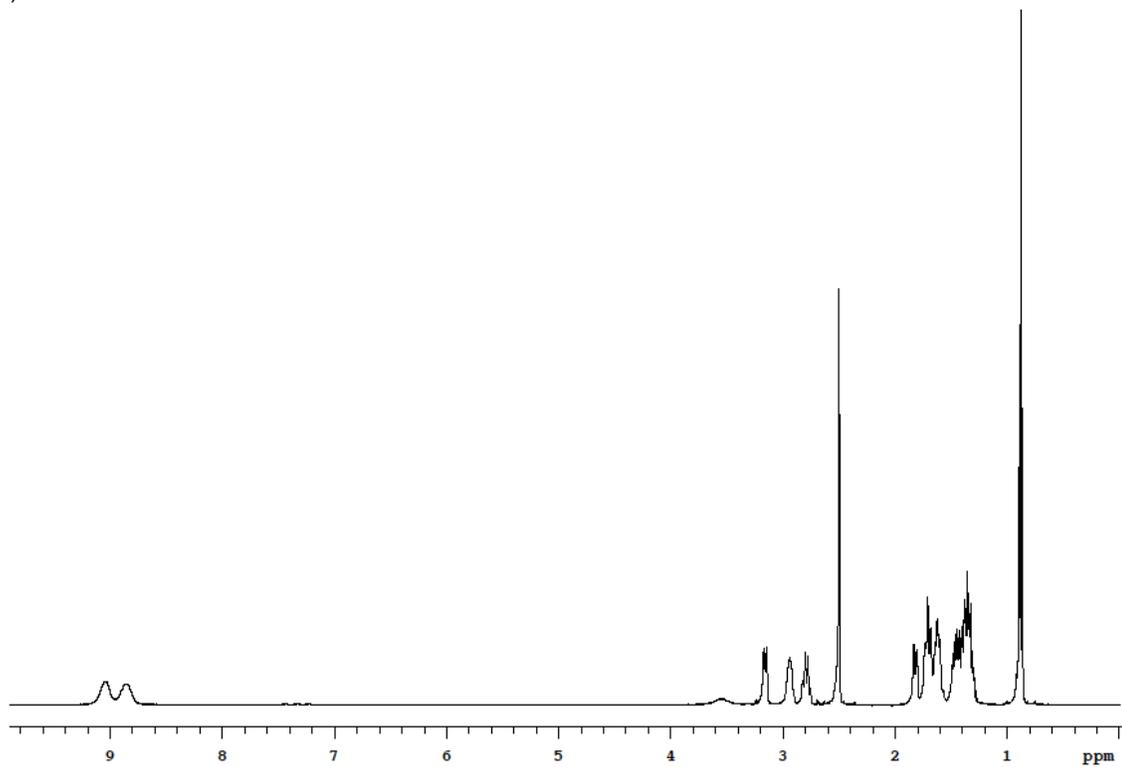

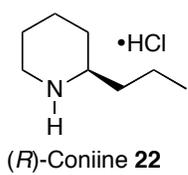

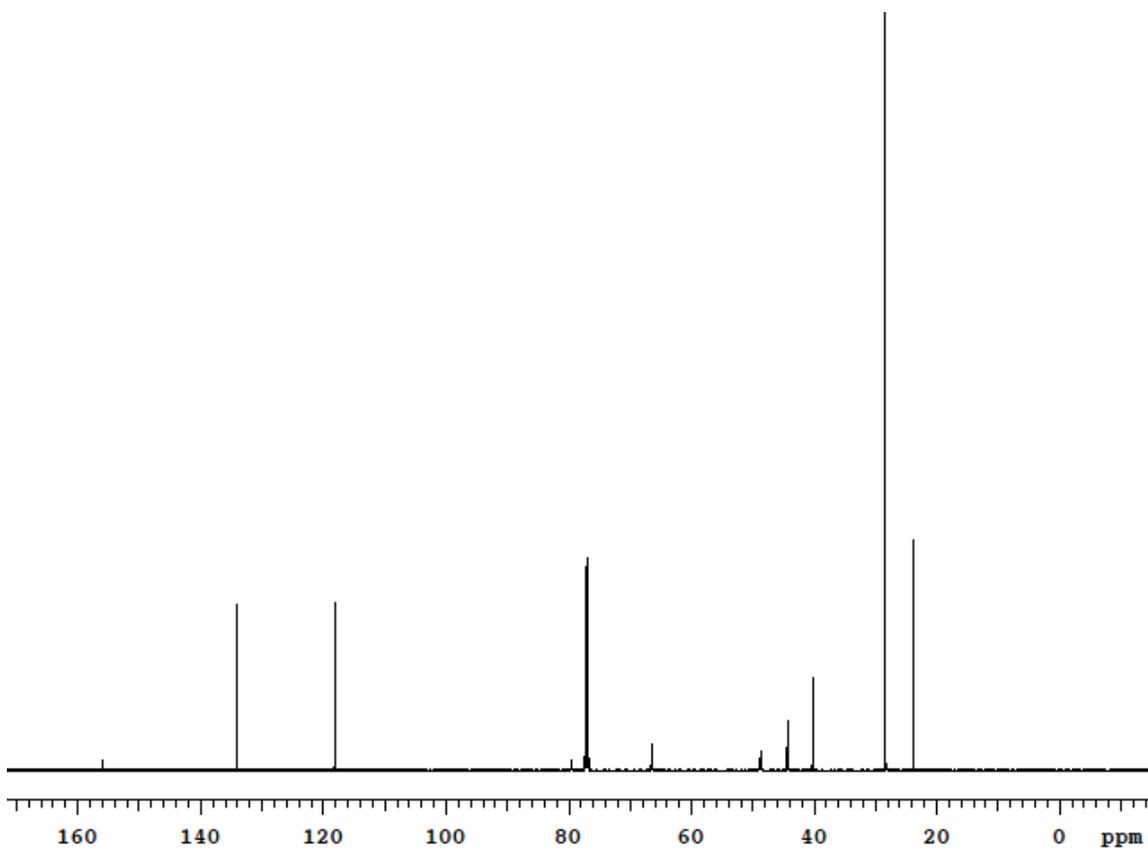

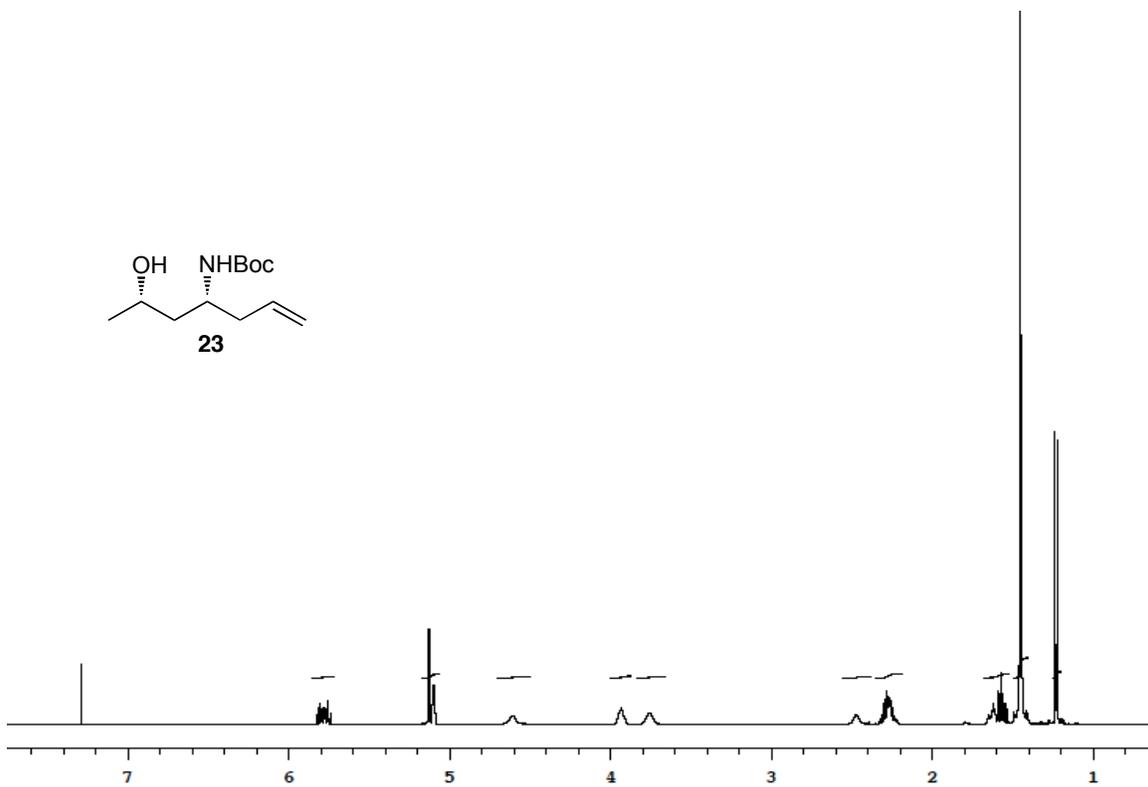

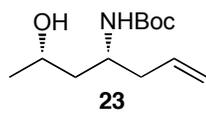

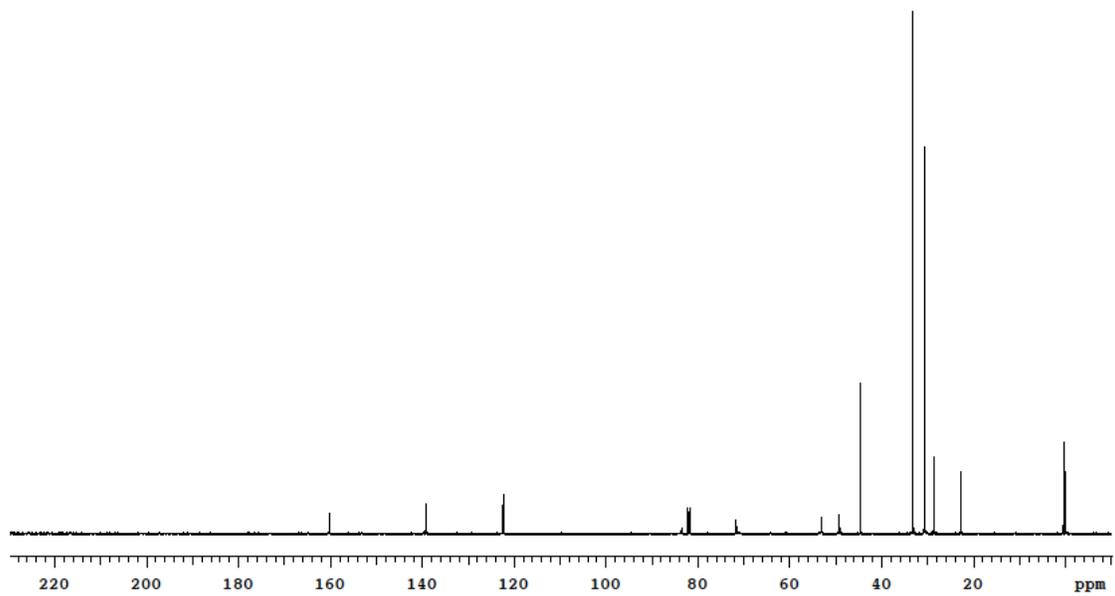

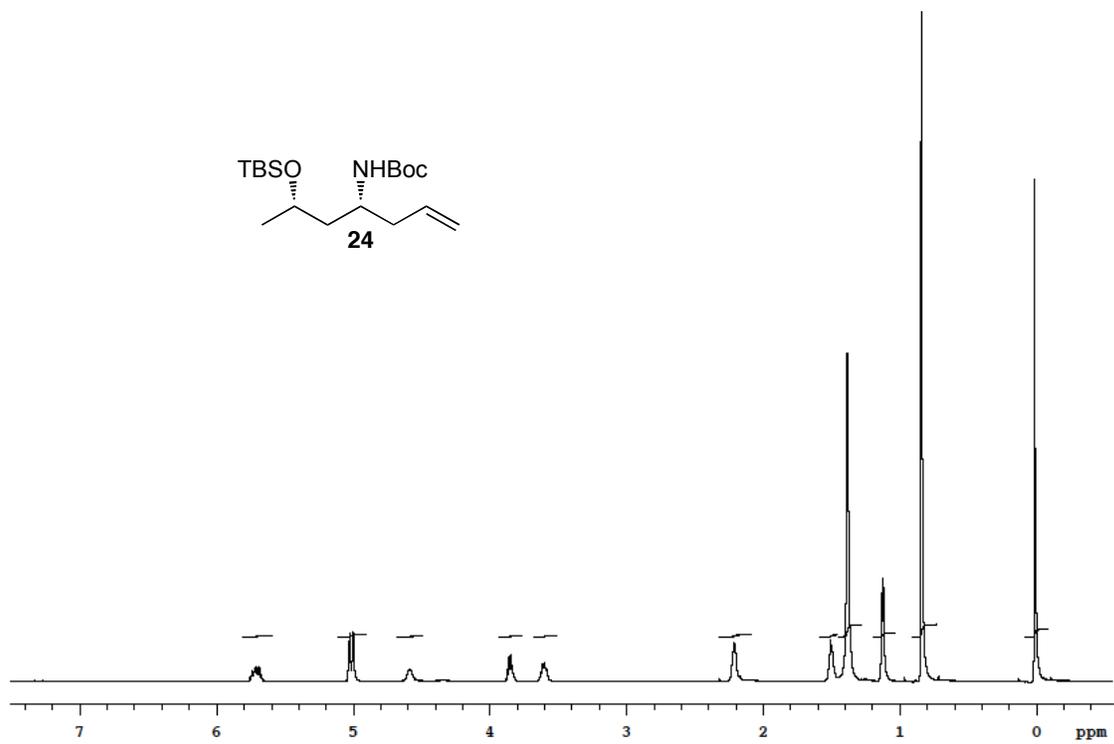

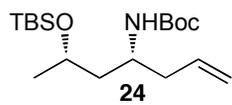

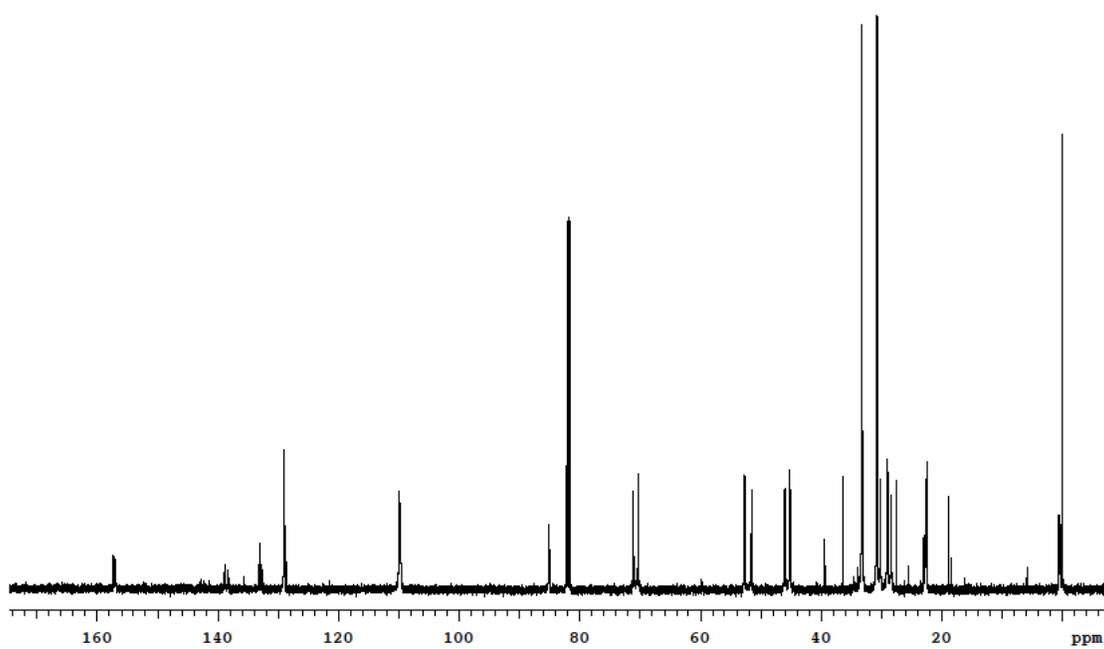

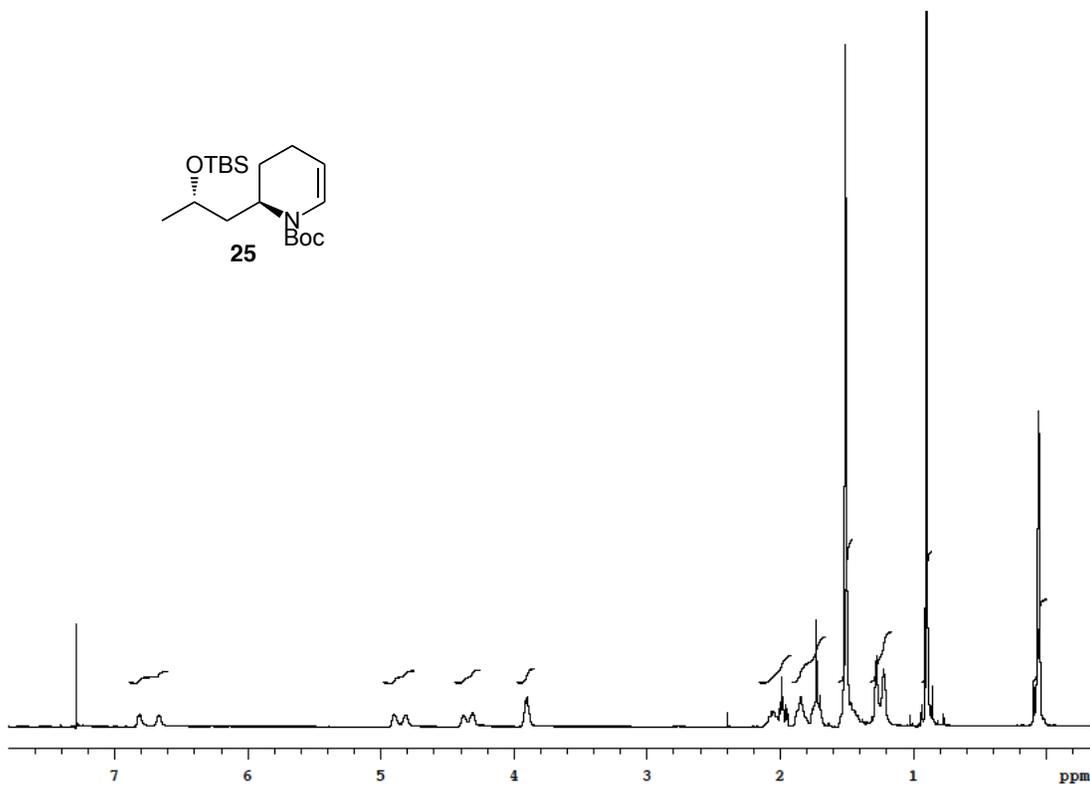

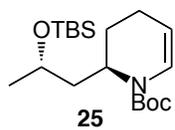

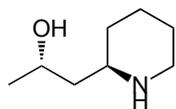

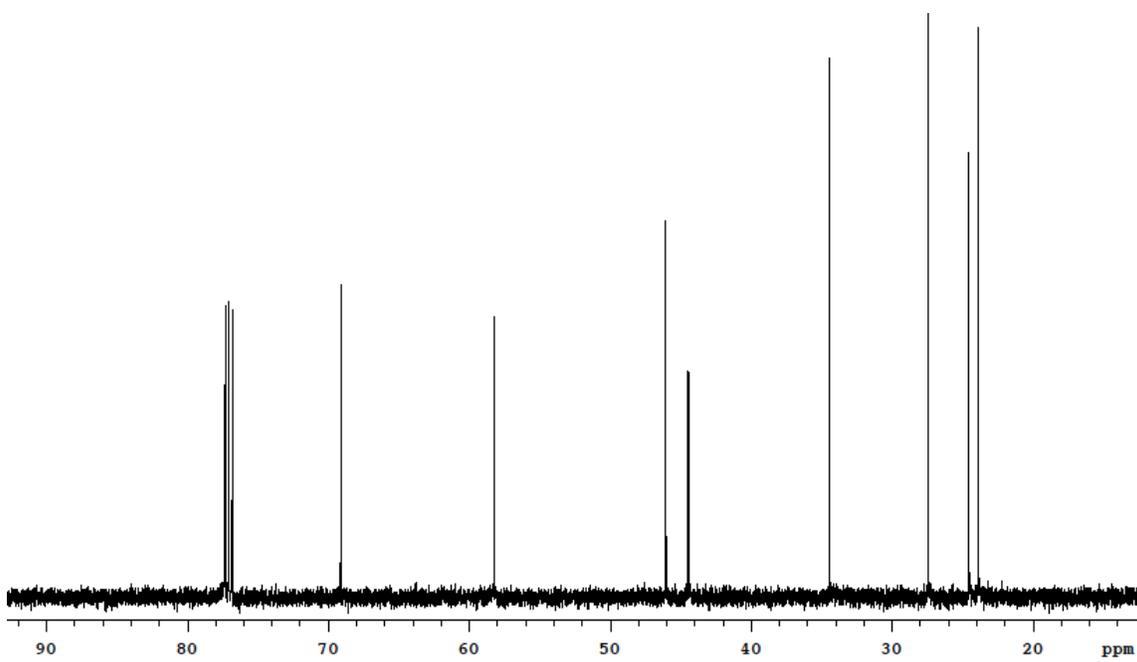

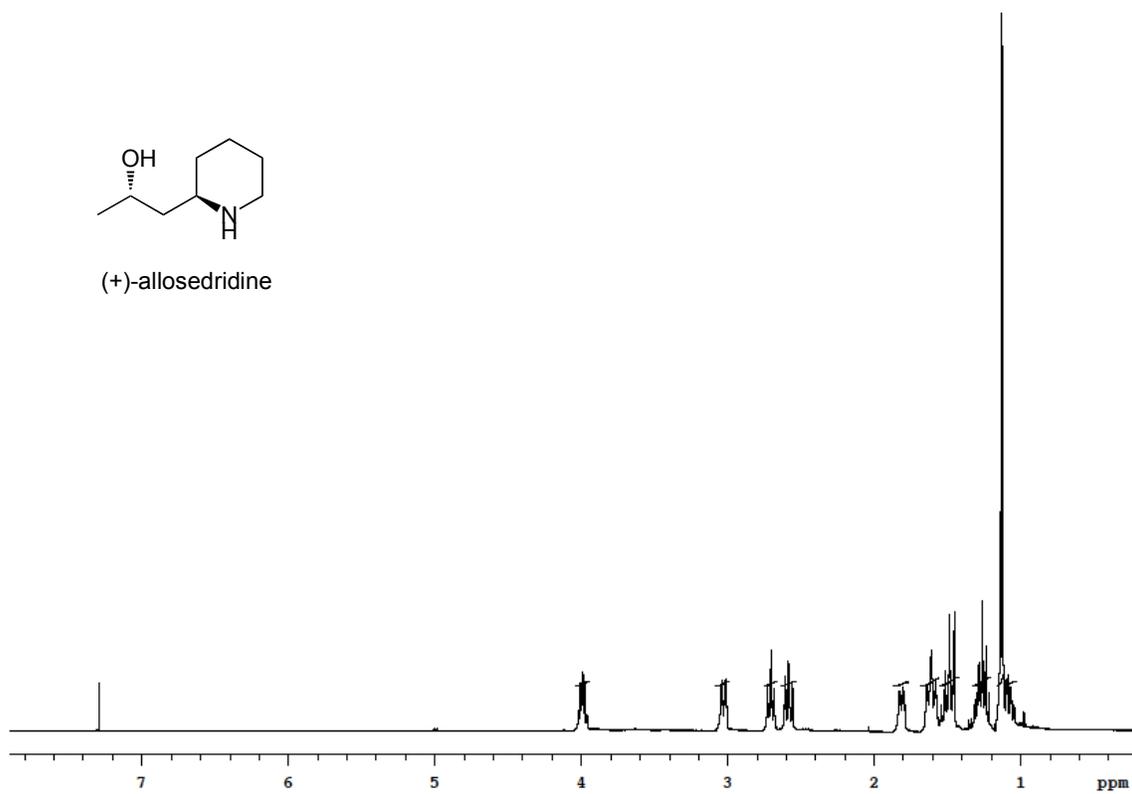

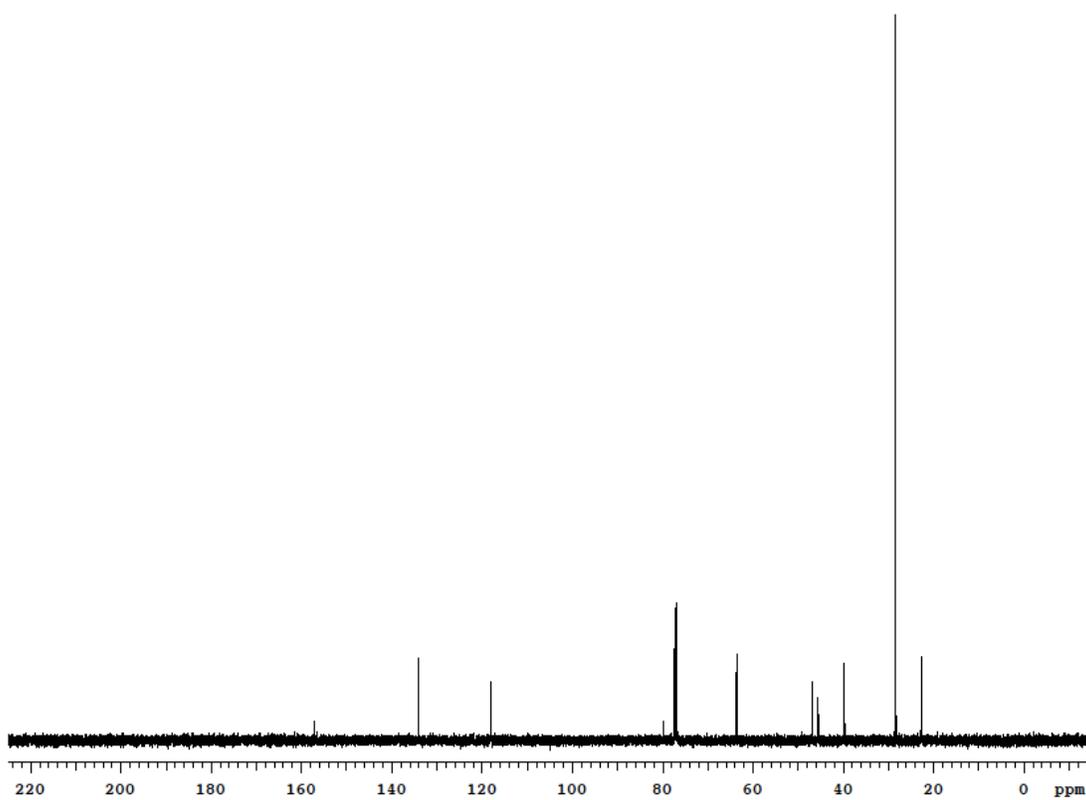

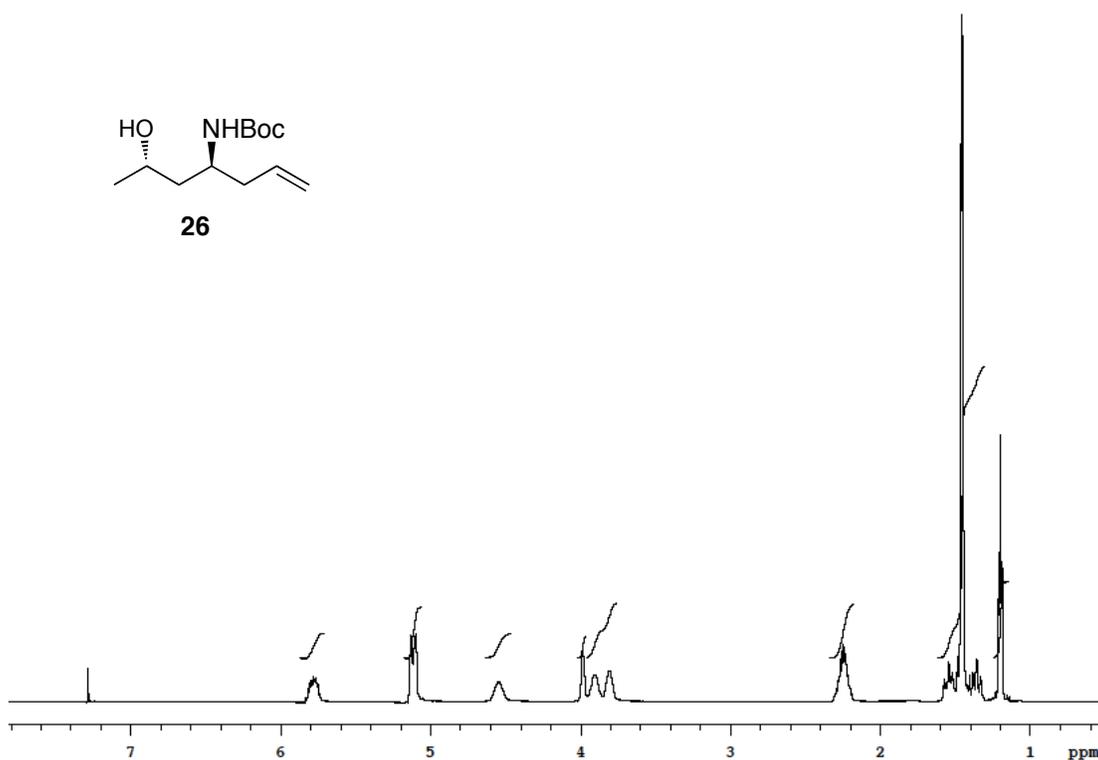

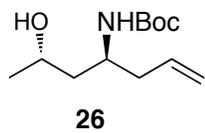

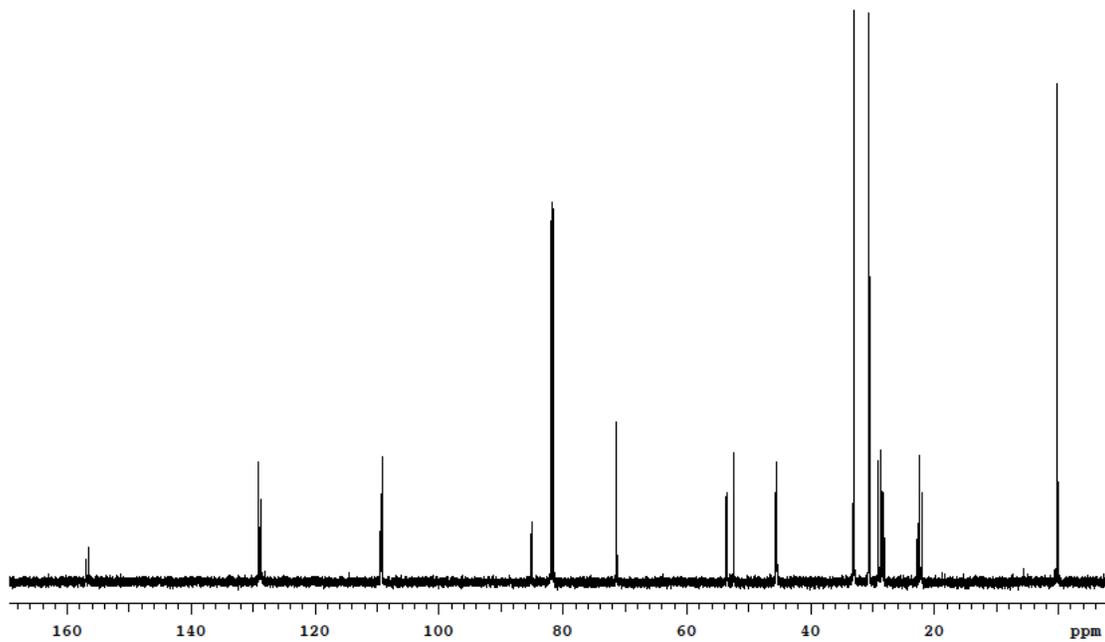

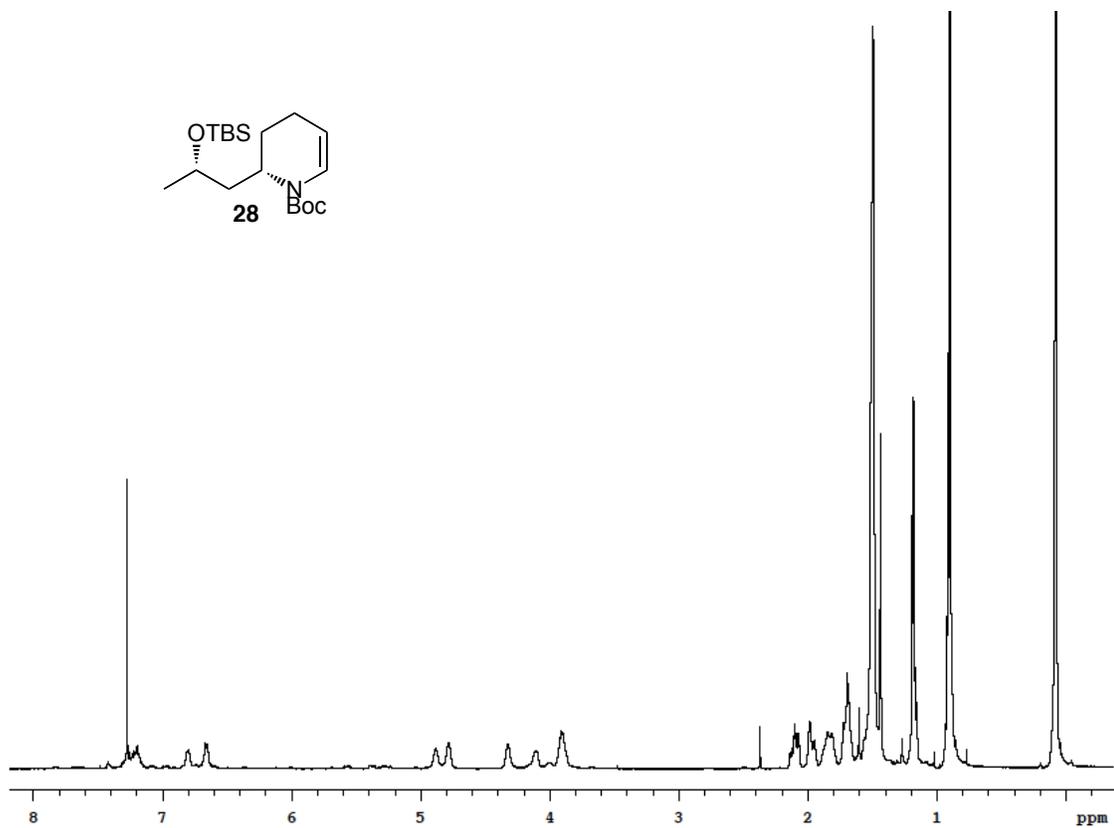

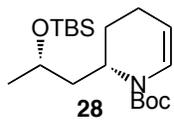

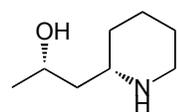

(+)-allosedridine

(+)-sedridine
